Cultural Change in Post-Migrant Societies Wiebke Sievers, 2023-12-11 This open access book links the artistic and cultural turn in migration studies to the larger struggle for narrative and cultural change in European migration societies It proposes theoretical and methodological approaches that highlight how ideas of change expressed in artistic and cultural practices spread and lead to wider cultural change The book also looks at the slow processes of change in large cultural institutions that emerged at a time when culture was nationalised It explains how individual and group activities can have an impact beyond their immediate surroundings Finally the book discusses how migration researchers have cooperated with arts and cultural producers and used artistic means to increase the effect of their research in the wider public As such the book provides a great resource for graduate students and researchers in the social sciences and the humanities who have an interest in migration studies and want to move beyond interpreting the world towards changing it [Energy and Water Development Appropriations for 1996](#) United States. Charting Literary Urban Studies Jens Martin Gurr, 2020-12-10 Guided by the multifaceted relations between city and text Charting Literary Urban Studies Texts as Models of and for the City attempts to chart the burgeoning field of literary urban studies by outlining how texts in varying degrees function as both representations of the city and as blueprints for its future development The study addresses questions such as these How do literary texts represent urban complexities and how can they capture the uniqueness of a given city How do literary texts simulate layers of urban memory and how can they reinforce or help dissolve path dependencies in urban development What role can literary studies play in interdisciplinary urban research Are the blueprints or recipes for urban development that most quickly travel around the globe such as the creative city the green city or the smart city really always the ones that best solve a given problem Or is the global spread of such travelling urban models not least a matter of their narrative packaging In answering these key questions this book also advances a literary studies contribution to the general theory of models tracing a heuristic trajectory from the analysis of literary texts as representations of urban developments to an analysis of literary strategies in planning documents and other pragmatic non literary texts [Difference Unbound](#) Stamos Metzidakis, 2012-01-01 This is the first book to examine the precise relationship between pluralism and the production of Western literature and criticism from the eighteenth century to the present It underscores the historical rather than exclusively epistemological reasons behind what is here called the rise of literary pluralism This rise entails on the one hand the modern day phenomenon of an ever increasing number of readings of both canonical and contemporary works of verbal

art and on the other our ever growing body of literature written with an eye towards different types of characters situations forms and styles Reviewing a wide range of authors and thinkers from German French and English Romantics to Anglo American and European poststructuralist theorists it shows how and why the current literary emphasis on difference derives from an unquestioned allegiance to the notion of cultural pluralism While never denying the value of the latter it seeks instead to analyze the oftentimes unquestioned implications of this historically situated belief within the specific realm of literary studies
