Milton, 2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don't work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew's latest interview with Seattle Radio <http://kiroradio.com/listen/9972862> *The Rise and Fall of Civic Education* Michael Learn, 2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it *The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape* investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through the rising tensions from culture wars as America's
