Economics 13th Canadian Edition:

Macroeconomics: Canadian Edition Updated N. Gregory Mankiw, William M. Scarth, 2003-08-12 The 1 bestselling intermediate macroeconomics book Mankiw's masterful text covers the field as accessibly and concisely as possible in a way that emphasizes the relevance of both macroeconomics's classical roots and its current practice Featuring the latest data new case studies and a number of significant content updates the new Sixth Edition takes the Mankiw legacy even further

The Microeconomics Anti-Textbook Rod Hill, Tony Myatt, 2021-12-02 Mainstream textbooks present economics as an objective science free from value judgements The Microeconomics Anti Textbook demonstrates this to be a myth one which serves to make such textbooks not only off puttingly bland but also dangerously misleading in their justification of the status quo and neglect of alternatives In this fully updated and expanded edition of their celebrated book Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way before presenting an anti text analysis and critique Challenging the assumptions arguments and models Hill and Myatt provide the essential guide to decoding the textbooks and show that real economics is far more interesting and subversive than the simplistic version presented to students

Mark Blaug: Rebel with Many Causes Marcel Boumans, Matthias Klaes, 2013-11-29 This collection of eminent contributions discusses the ideas and works of Mark Blaug who has made important and often pioneering contributions to economic history economic methodology the economics of education development economics cultural econo

Economic Growth and the High Wage Economy Morris Altman, 2013-06-26 This book provides a theoretical framework to better understand how firms economies and labor markets have evolved This is done in a reader friendly fashion without complex mathematical arguments and proofs Economic Growth and the High Wage Economy shows how high wage economies help make firms and economies more productive and why high wage economies can be competitive even in an increasingly globalized environment It also demonstrates why concerns that labor supply will dry up as wages increase and social benefits rise are largely based on impoverished economic reasoning The first chapters provide a theoretical basis for the rest of the book showing for instance how higher wages are prone to increasing the level of economic efficiency by getting people to work harder and smarter mainly smarter Altman also explains that our understanding of technological change can be markedly improved by modelling technological change as a product of higher wages and improved working conditions and other shocks to the economic system As the book develops it is shown that increasing and high levels of income inequality are not necessary for growth and development because the economic pie grows when the economic wellbeing of the lower half and even the middle improves The evolution of the state can also be better understood by applying this analytical framework So too can the persistence of inefficient systems of production and cultural traits that appear to be inconsistent with economic prosperity On top of this the book examines the implications of Altman's theoretical framework for macroeconomic analysis and policy Finally it is shown that labor supply can be better understood by

introducing target income into the analytical mix The main contribution of this book is providing the theoretical underpinning for why relatively high wages and moreover competition with high wages is good for dynamic growth and development This work establishes why an alternative model of labor supply based on the notion and reality of target income does a better job of explaining the evolution of labor supply The latter also reinforces the view that increasing wage and workers benefits should not be expected to damage the economy even in the realm of labor supply This book will be of interest to public policy experts trade unions human rights experts and scholars of behavioural economics labour economics and globalization An Investigation of the Coals of Canada with Reference to Their Economic Qualities John Bonsall Porter, Richard John Durley, 1915 **Canadiana** , 1988-05 The United States Catalog Mary Burnham, Carol Hurd, 1928 *International Index to Periodicals* , 1924 An author and subject index to publications in fields of anthropology archaeology and classical studies economics folklore geography history language and literature music philosophy political science religion and theology sociology and theatre arts **International Economic Conference, Geneva, May 1927** League of Nations.
