Reforming the World Monetary System Carol M Connell,2015-10-06 Focusing on Fritz Machlup Connell presents the story of the Bellagio Group and its contribution to modern finance Initiated by Machlup the Bellagio Group was made up of thirty two non government academic economists During the years between 1964 and 1977 the Group met eighteen times and made a series of recommendations for policymakers *The Political Economy of Civil War and UN Peace Operations* Mats Berdal,Jake Sherman,2023-03-31 This book examines the operational and political challenges facing UN peace operations deployed in countries where civil war and protracted violence have given rise to the complex and distinctive political economies of conflict The volume explores the nature and impact of such political economies informal systems of power and influence formed by the interaction of local national and region wide war economies with the political agendas of conflict actors on the course of UN peace operations It focuses in detail on the UN s long running peace operations in the Democratic Republic of Congo South Sudan Afghanistan Sierra Leone Mali and Somalia The book is centrally concerned with the interaction of UN missions with the power structures and local conflict dynamics that shape individual mission settings and the challenges these pose for mediation protection of civilians and other tasks It also offers a critical assessment of the various ways in which the UN system from its headquarters in New York to the field has confronted the policy challenges posed by political economies of conflict affected states societies and regions It advances a pragmatic set of policy recommendations aimed at improving the UN s ability to confront predatory and exploitative war economies At the same time the volume makes it clear that political and institutional obstacles to more effective UN action are certain to remain profound and are unlikely ever to be fully overcome let alone eradicated Despite making some progress since the 1990s to better understand the political economy of civil wars the UN has struggled with how to tackle informal networks of power and their consequences for efforts to end wars The book will be of special interest to students of war and conflict studies statebuilding political economy of conflict UN interventionism and peacebuilding and IR Security in general **EU Law of Economic & Monetary Union** Fabian Amtenbrink,Christoph Herrmann,2020-05-21 Presenting a sweeping analysis of the legal foundations institutions and substantive legal issues in EU monetary integration The EU Law of Economic and Monetary Union serves as an authoritative reference on the legal framework of European economic and monetary union The book opens by setting out the broader contexts for the European project historical economic political and regarding the international framework It goes on to examine the constitutional architecture of EMU the main institutions and their legal powers the core legal provisions of monetary and economic union and the relationship of EMU with EU financial market and banking regulation The concluding section analyses the current EMU crisis and the main avenues of future reform The Governance of Macroprudential Policy Tracy C Maguze,2024-01-11 This book critically examines the theoretical foundations and legal framework for macroprudential policy its tools and governance in the UK the US and the EU It goes deeper into a

normative discussion of the legitimacy of macroprudential policy in these jurisdictions where the mandate for maintaining financial stability has been delegated to independent authorities The Global Financial Crisis of 2007 2008 reopened debates regarding legitimacy of the independent regulatory state given its democratic deficit The response to a perceived legitimacy gap has been to increase political oversight in financial policymaking and regulation The book posits that the real problem is not a lack of democracy but rather a lack of social justice Across the globe there is growing dissatisfaction with a financial system and regulatory process that appear depersonalised and perpetuate inequalities Citizens are calling for more socially just systems of governance and the future success of financial policymakers and regulators will hinge on this Given the marked distributional effects that have been noted in some macroprudential policy tools the book questions whether macroprudential policy should be solely based on highly rationalised and strongly quantitative reasons By proposing that macroprudential policymakers should have a social justice mandate alongside their financial stability mandate as well as legal mechanisms for operationalising the added authority the book contributes to the growing discourse on the role of social justice in public policy
