Economics for Public Health Practice and Research presents priorities for research in the field of public health economics. It acknowledges the role played by natural environment in promoting better health and the place of genetics, environment, and socioeconomic status in determining population health. Ideal for health economists, public health researchers, local government workers, health care professionals, and those responsible for health policy development. *Applied Health Economics for Public Health Practice and Research* is an important contribution to the economic discussion of public health and resource allocation. *Social Workers as Game Changers* Laura Lewis, 2017-01-30. Designed to promote active hands-on learning, this unique book is composed of 11 chapter-length case studies that prepare students to address the types of challenging social issues they will encounter as practicing social workers. The cases, covering topics from immigration, gangs, and education to race, mental health, and end-of-life care, illustrate the interrelationship between the micro, mezzo, and macro levels and facilitate not just recall of facts but also higher-level learning. Each case allows students to confront realistic scenarios as they evaluate, analyze, and synthesize information, resulting in more engaged and informed classroom discussions.

Gender Assessment of the Health Sector Eric Tumwesigye, 2014. *Handbook of Education Policy Research* Lora Cohen-Vogel, Peter Youngs, Janelle Scott, 2025-07-17. The second edition of the *Handbook of Education Policy Research*, the largest volume published in AERA's history, addresses a variety of policy and contextual issues in early childhood, K-12, and postsecondary education that have received extensive empirical attention during the past 15 years. With the pandemic and social turmoil as a backdrop, the editors build on the breadth and depth of the first edition while expanding the scope of the project to include subjects, methods, theories, and analyses that have contributed powerfully to the study of education policy and politics in the 2010s and 2020s. The field has become more comprehensive and inclusive, and the authors represent a diversity of racial, ethnic, and gender identities and intellectual and disciplinary orientations. Most chapters come from multiple authors, reflecting the multi-sourced development of research in education policy since the first volume was published. This compilation consists of 70 chapters and nine commentaries that map past, present, and future directions of the field and richly attend to critical issues of interest to students, researchers, policy makers, and practitioners. **Economic Survey**, 2018. **Paper**, 1920. **Studies in Income and Wealth**, 1937. **Paper**.
