Investing in the Health and Well-Being of Young Adults National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Improving the Health, Safety, and Well-Being of Young Adults, 2015-01-27 Young adulthood ages approximately 18 to 26 is a critical period of development with long lasting implications for a person's economic security health and well being Young adults are key contributors to the nation's workforce and military services and since many are parents to the healthy development of the next generation Although millennials have received attention in the popular media in recent years young adults are too rarely treated as a distinct population in policy programs and research Instead they are often grouped with adolescents or more often with all adults Currently the nation is experiencing economic restructuring widening inequality a rapidly rising ratio of older adults and an increasingly diverse population The possible transformative effects of these features make focus on young adults especially important A systematic approach to understanding and

responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

Ukraine Over the Edge Gordon M. Hahn, 2018-02-08. The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making. Two great schisms shaped events: one within Ukraine, its western and southeastern parts divided along cultural and political lines; the other was driven by geopolitical factors. Competition between Russia and the West exacerbated Ukraine's divisions. This study focuses on the historical background and complex causality of the crisis, from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti (Independence Square) to the making of the post-revolt regime. In the context of a new cold war, the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers massacre, the ouster of President Viktor Yanukovich, and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass.

Oil and the political economy in the Middle East Martin Beck, Thomas Richter, 2021-08-17. The downhill slide in the global price of crude oil, which started mid-2014, had major repercussions across the Middle East for net oil exporters as well as importers closely connected to the oil-producing

countries from the Gulf Following the Arab uprisings of 2010 and 2011 the oil price decline represented a second major shock for the region in the early twenty first century one that has continued to impose constraints but also provided opportunities Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil price decline this book connects oil market dynamics with an understanding of socio political changes Inspired by rentierism the contributors present original studies on Bahrain Egypt Jordan Kuwait Lebanon Oman Qatar Saudi Arabia and the United Arab Emirates The studies reveal a large diversity of country specific policy adjustment strategies from the migrant workers in the Arab Gulf who lost out in the post 2014 period but were incapable of repelling burdensome adjustment policies to Egypt Jordan and Lebanon who have never been able to fulfil the expectation that they could benefit from the 2014 oil price decline With timely contributions on the COVID 19 induced oil price crash in 2020 this collection signifies that rentierism still prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy

The Ukraine Conflict Derek Averre, Kataryna Wolczuk, 2018-10-19 It is not hyperbole to suggest that the foundations of post cold war security in Europe have been badly damaged by the conflict in Ukraine since 2014 Russia's annexation of Crimea and intervention in eastern Ukraine appear to have created a simmering conflict which may take years to resolve and have profound consequences for the European security environment This volume explores the various political economic and social aspects of these profound changes and their wider significance for Europe bringing together contributions by scholars from across the continent and in various disciplinary fields to offer an authoritative in depth examination of the complex causes of the Ukraine crisis and the consequences for Ukrainian statehood Ukraine's relations with Russia Russia's own domestic governance and Russia's relations with Europe This book was originally published as a special issue of *Europe Asia Studies*
