Economics Final Examination Paper1 Memorandum 2014:

Seychelles International Monetary Fund. African Dept.,2015-07-22 Context The robust recovery from the 2008 balance of payments and debt crisis has resulted in improved economic and social outcomes Continued policy discipline and reforms are needed for the microstate to mitigate its geographical and population constraints and maintain momentum in developing a diversified and resilient economy Focus With the fiscal stance anchored by the authorities debt reduction objective macroeconomic discussions concentrated on the smooth functioning of monetary and exchange rate policies On the structural agenda the dialogue focused on policies to promote sustained and inclusive growth particularly on the appropriate role for state owned enterprises SOEs Review The program is on track The authorities met the end December quantitative performance criteria except for narrowly exceeding the ceiling on reserve money The structural agenda remains broadly on track despite some delays Staff recommends completion of the second review under the Extended Arrangement and modification of the performance criteria for end June and end December 2015 and supports the authorities request for a waiver for the end December 2014 performance criterion for reserve money Outlook and risks With the external position having stabilized since the last review fundamentals are strengthening However the economy remains highly vulnerable to global developments including weakness in the key European markets while domestic risks center on the role of the SOEs Recommendations The authorities objective of reducing public debt below 50 percent of GDP by 2018 remains an appropriate and attainable anchor for fiscal policy The monetary policy framework should be further enhanced by increasing its forward orientation in the context of a flexible exchange rate Structural measures should focus on fostering inclusiveness and private sector led growth while improving economic governance and the focus of SOEs Data Data provision is broadly adequate for surveillance Priority areas include improved GDP statistics strengthening external sector statistics and extending coverage of the international investment position Economic Governance in Europe Federico Fabbrini,2016-01-28 The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union EU Going beyond the existing literature Federico Fabbrini s book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member

states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union

A Thousand Cuts Alexandros Kentikelenis, Thomas Stubbs, 2023 The dominant policy response to economic crises over the past four decades has been the introduction of austerity a mix of budget cuts and reforms to downsize the role of the state In *A Thousand Cuts* Alexandros Kentikelenis and Thomas Stubbs examine the activities of the world's leading advocate of austerity the International Monetary Fund As one of the first systematic assessments of the impact of austerity on people's lives around the world *A Thousand Cuts* makes an important contribution to the continuing debate on how to foster social protection in light of economic crises and IMF mandated policy reforms

EU Socio-Economic Governance since the Crisis Jonathan Zeitlin, Amy Verdun, 2018-12-07 This book is the first to be dedicated entirely to the European Semester a new framework for policy coordination across European Union EU member states The Semester represents a major advancement in EU governance Created in 2010 in the wake of the financial and sovereign debt crises and revamped in 2015 it was intended to provide a new socio economic governance architecture to coordinate national policies without transferring legal sovereignty to EU level The papers in this collection are written by authors who have already contributed to this literature and have conducted original research for their studies The book offers an empirical and theoretical assessment of the European Semester examining its implications along three critical axes running respectively between the economic and the social the supranational and the intergovernmental and the technocratic and democratic poles of EU governance The book concludes that the European Semester challenges established theoretical understandings of EU governance as it is a prime example of the complexity that supersedes simple polar oppositions The chapters were originally published in a special issue of the *Journal of European Public Policy*
