Economics Final Examination Papermemorandum 2014:

Accountability in the Economic and Monetary Union Menelaos Markakis, 2020-04-02 Following the financial and public debt crisis the EU's Economic and Monetary Union EMU has been under intense political scrutiny The measures adopted in response to the crisis have granted additional powers to the EU and national authorities the exercise of which can have massive implications for the economies of the Member States financial institutions and of course citizens The following questions arise how can we hold accountable those institutions that are exercising power at the national and EU level What is the appropriate level type and degree of accountability and transparency that should be involved in the development of the EU's governance structures in the areas of fiscal and economic governance and the Banking Union What is the role of parliaments and courts in holding those institutions accountable for the exercise of their duties Is the revised EMU framework democratically legitimate How can we bridge the gap between the citizens and the institutions that represent them and those institutions that are making these important decisions in the field of economic and monetary policy This book principally examines the mechanisms for political and legal accountability in the EMU and the Banking Union It examines the implications that the reforms of EU economic governance have had for the locus and strength of executive power in the Union as well as the role of parliaments and other political fora and courts in holding the institutions acting in this area accountable for the exercise of their tasks It further sets out several proposals regarding transparency accountability and legitimacy in the EMU

Economic Governance in Europe Federico Fabbrini, 2016-01-28 The Euro Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union EU Going beyond the existing literature Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU disaggregating three different dimensions 1 the vertical relations of power between the member states and the EU institutions 2 the relations of power between the political branches and the courts and 3 the horizontal relations of power between the EU member states themselves The first part of the book argues that in the aftermath of the Euro crisis power has been shifting along each of these axes in paradoxical ways In particular through a comparison of the United States Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs an unprecedented level of judicialization of economic questions and a growing imbalance between the member states in the governance of fiscal matters As the book makes clear however each of these dynamics is a cause for concern as it calls into question important constitutional values for the EU such as the autonomy of the member states in taking decision about taxing and spending the preeminence of the political process in settling economic matters and

the balance between state power and state equality The second part of the book therefore devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends In particular Fabbrini considers the ideas of raising a fiscal capacity restoring the centrality of the EU legislative process and reforming the EU executive power and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union
