

Microeconomics Chapter 1 Notes

Economics: The study of how society manages its scarce resources

- Greek Word = "one who manages a household"

Scarcity: The limited nature of society's resources

10 Principles of Economics

Principle 1: People face trade-offs

Trade-off: A situational decision that involves diminishing or losing one quality, quantity, or property of a set or design in return for gains in other aspects

- Example: Taking a day off work to go see a concert. See your favourite band but lose a day of wage
- **One thing increases and another decreases**

Efficiency vs Equity

Efficiency: The property of society getting the most it can from its scarce resources

- Example: Individual income tax

Equity: The property of distributing economic prosperity fairly among the members of society

- Example: Welfare system and employment insurance

Principle 2: The cost of something is what you give up to get it

Because people face trade-offs, making decisions requires comparing the costs and benefits of alternative courses of action.

Opportunity cost: Whatever must be given up to obtain some item

- Example: giving up going to see a movie to study for a test. The opportunity cost is the cost of the movie and the enjoyment of seeing it.

Principle 3: Rational people think at the margin

Rational people: those who systematically and purposefully do the best they can to achieve their objectives

Marginal changes: Small incremental adjustments to a plan of action

A rational decision maker takes an action if and only if the marginal benefit of the action exceeds the marginal cost
