Business Intelligence for your SAP R/3 deployment

Organizations rely on SAP® to improve business performance. SAP® relies on Business Objects—the industry leader in Business Intelligence (BI)—to extract maximum value from SAP® data, enabling their customers to achieve a return on their investment. BusinessObjects XI Built for SAP® enables companies to provide all users with timely information from SAP® R/3, SAP® Business Information Warehouse (BW), and other data sources, providing a single version of the truth across their business. BusinessObjects XI Built for SAP® is the most complete business intelligence offering for SAP® customers, including reporting, query and analysis, data integration, and performance management. SAP® customers now have unparalleled access to information, creating agile organizations that can react to changing business environments to optimize their performance.

Crystal Reports runs across all functional areas of SAP

With the most SAP® BI customers in the industry, Business Objects is the de-facto standard for SAP. Business Objects continues to work directly with SAP to deliver the open solutions that our joint customers demand. Building on five years of successful collaboration, SAP® continues to OEM and resell Business Objects as the only third-party reporting solution provided out-of-the-box with SAP. Our solutions for SAP are based on Business Objects' sixth generation integration as well as eleventh generation enterprise reporting—Crystal Reports. In addition, BusinessObjects XI Built for SAP has the most NetWeaver certifications in the industry and is the intelligent choice for SAP R/3 customers.

Does your organization struggle with any of the following business issues:

- ▶ The need for a less complex and costly data warehousing solution than SAP® BW?
- ▶ The interactivity of programmatic reporting tools?
- ▶ Sales, financial, operational and regulatory reports not delivered in a secure or timely manner?
- ▶ Employees wasting time and money debating whether the numbers they have are complete or accurate?
- ▶ Executives who are frustrated with content that is not presentation-quality?
- ▶ The ability to quickly and easily format reports suitable for customers, partners and suppliers?
- ▶ Employees who are not able to easily answer their own business questions?
- ▶ Not having a single tool to extract data from SAP® R/3 and non-SAP sources?

Berthold, Christian Borgelt, Frank Höppner, Frank Klawonn, 2010-06-23 Each passing year bears witness to the development of ever more powerful computers increasingly fast and cheap storage media and even higher bandwidth data connections This makes it easy to believe that we can now at least in principle solve any problem we are faced with so long as we only have enough data Yet this is not the case Although large databases allow us to retrieve many different single pieces of information and to compute simple aggregations general patterns and regularities often go undetected Furthermore it is exactly these patterns regularities and trends that are often most valuable To avoid the danger of drowning in information but starving for knowledge the branch of research known as data analysis has emerged and a considerable number of methods and software tools have been developed However it is not these tools alone but the intelligent application of human intuition in combination with computational power of sound background knowledge with computer aided modeling and of critical reflection with convenient automatic model construction that results in successful intelligent data analysis projects Guide to Intelligent Data Analysis provides a hands on instructional approach to many basic data analysis techniques and explains how these are used to solve data analysis problems Topics and features guides the reader through the process of data analysis following the interdependent steps of project understanding data understanding data preparation modeling and deployment and monitoring equips the reader with the necessary information in order to obtain hands on experience of the topics under discussion provides a review of the basics of classical statistics that support and justify many data analysis methods and a glossary of statistical terms includes numerous examples using R and KNIME together with appendices introducing the open

source software integrates illustrations and case study style examples to support pedagogical exposition. This practical and systematic textbook reference for graduate and advanced undergraduate students is also essential reading for all professionals who face data analysis problems. Moreover, it is a book to be used following one's exploration of it. Dr. Michael R. Berthold is Nycomed Professor of Bioinformatics and Information Mining at the University of Konstanz, Germany.
