Berman, 2009-11-02 *Case Conceptualization and Treatment Planning Second Edition* is a core textbook that teaches students in counseling psychotherapy and clinical psychology how to formulate a treatment plan that is integrated with theory and personalized to each client Case conceptualization is the process of providing a theoretical explanation for what the client is like experiencing and why they are like this In order to do this a student must draw from a variety of theoretical approaches The treatment plan is the method plan a therapist formulates in order to help the client achieve change This book provides a detailed step by step guide for students to practice formulating case conceptualizations and treatment plans using a variety of popular theoretical models Each chapter focuses on a specific theoretical approach Within each chapter the author provides client interviews and a sample case conceptualization followed by a treatment plan Then the book presents another client interview and guides the student through the process of constructing a case formulation and treatment plan This helps
