Development in the Middle East Rodney Wilson, 2021-09-23 This new edition examines how development in the Middle East is being influenced by global economic change This comparative textbook focuses on the region's strengths and highlights development success especially in the Gulf Turkey and Israel The major structural changes in the economies of the Middle East are analysed and current employment challenges are discussed The impact of demographic changes is considered notably the dramatic decline in birth rates which will have implications for future employment The contribution of banks and capital markets to the region's development is appraised including that of Islamic financial institutions which play a prominent role in the Gulf Cooperation Council GCC countries but are on the margins of the financial systems elsewhere

Historically development in the GCC was linked to oil and gas production and prices a key issue being whether these are being decoupled as economies diversify and become more self sustaining The evidence on this from the GCC is encouraging with transparent and accountable financial management and major improvements in economic governance despite the lack of democracy Examining the drivers of economic development in the Middle East in a regional and global context this fully updated textbook is a key resource for students and academics interested in economic development and the political economy of the Middle East

Inequality and Growth: Patterns and Policy Joseph E. Stiglitz, 2016-11-16 It was a part of the wisdom of mainstream economics that in the early stages of development inequality would rise but as growth persisted it would eventually decline Early evidence seemed to suggest that this pattern would be borne out But as time passed and growth persisted inequality continued to grow casting doubt on the received wisdom The aim of this two volume book is to analyze the current state of global and regional inequality dissect the phenomenal increase in inequality that we have seen occur in recent times and better understand the complex relationship between inequality and development The political instability and conflict that we see around the world arguably has connection to economic deprivation of large segments of society and the perception of marginalization This two volume work acquires a special significance in the light of these developments
