Traverso, 2006-08-15 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there's a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS *A Mathematical Primer of Molecular Phylogenetics* Xuhua Xia, 2020-04-13 This volume *A Mathematical Primer of Molecular Phylogenetics* offers a unique perspective on a number of phylogenetic issues that have not been covered in detail in previous publications The volume provides sufficient mathematical background for young mathematicians and computational scientists as well as mathematically inclined biology students to make a smooth entry into the expanding field of molecular phylogenetics The book will also provide sufficient details for researchers in phylogenetics to understand the workings of existing software packages used The volume offers comprehensive but detailed numerical illustrations to render difficult mathematical and computational concepts in molecular phylogenetics accessible to a variety of readers with different academic background The text includes examples of solved problems after each chapter which will be particularly helpful for fourth year undergraduates postgraduates and postdoctoral students in biology mathematics and computer sciences Researchers in molecular biology and evolution will find it very informative as well *1991 Symposium on Applied Computing, Kansas City, Missouri, April 3-5, 1991* Vijay

Transport Helmuth Trischler, Stefan Zeilinger, 2003 In this book historians from museums and academia examine transport artefacts and the systems of mobility in which they are embedded Large artefacts such as the Stephenson's Rocket locomotive a Lockheed F 104 Starfighter a Ford Model T are impressive manifestations of engineering ingenuity They help museum visitors understand the design and use of the technologies that move people and goods But they are also historical icons so different audiences be they professional historians of technology or casual visitors will interpret them in different ways In a transport exhibition individual artefacts can dominate a visitor's attention overwhelming the themes expressed by other material The power of such an artefact helps to attract interest but at the same time endangers its incorporation into a larger system Curators have to find ways to demonstrate the systemic nature of transport by integrating these objects with others the smaller component artefacts such as electrochemical batteries pneumatic tyres and dashboards and the social artefacts such as drivers consumers rules and institutions The authors consider a variety of transport artefacts from pioneering steam locomotives and early automobile interiors to jet engines and the automatically guided cars of the future Those with curatorial responsibilities also reflect on how theoretical notions about transport can be expressed in the practical context of a museum and how a reappraisal of visitors' responses to transport artefacts is leading to new ways of showcasing the history of mobility
