Bad Science Ben Goldacre, 2025-09-23 Have you ever wondered how one day the media can assert that alcohol is bad for us and the next unashamedly run a story touting the benefits of daily alcohol consumption Or how a drug that is pulled off the market for causing heart attacks ever got approved in the first place How can average readers who aren't medical doctors or Ph D's in biochemistry tell what they should be paying attention to and what's well just more bullshit Ben Goldacre has made a point of exposing quack doctors and nutritionists bogus credentialing programs and biased scientific studies He has also taken the media to task for its willingness to throw facts and proof out the window But he's not here just to tell you what's wrong Goldacre is here to teach you how to evaluate placebo effects double blind studies and sample sizes so that you can recognize bad science when you see it You're about to feel a whole lot better

Abuse of Minors in Clinical Studies Klaus Rose,2023-11-25 With the emergence of effective drugs and observed drug toxicities in babies two mantras emerged that children are therapeutic orphans and that children are not small adults US and EU laws demand pediatric studies as a condition for the approval of new drugs in adults This is called Pediatric Drug Development PDD Although apparently reasonable there are catches Children are vulnerable at birth but they grow and become bodily mature with puberty well before coming of age Minors are not another species The 18th birthday an administrative legal limit does not correspond to a physiological change Drugs treat the body not the legal status PDD results in pointless studies in bodily mature adolescents and in exaggerated studies in younger minors An originally well intentioned concept results in thousands of questionable studies worldwide This book draws attention to conflicts of interest and ethical dilemmas of PDD and questions its applicability for adolescents and minors that are no longer babies

Data Quality Management in the Data Age Haiyan Yu,2024-10-29 This book addresses data quality management for data markets including foundational quality issues in modern data science By clarifying the concept of data quality its impact on real world applications and the challenges stemming from poor data quality it will equip data scientists and engineers with advanced skills in data quality management with a particular focus on applications within data markets This will help them create an environment that encourages potential data sellers with high quality data to join the market ultimately leading to an improvement in overall data quality High quality data as a novel factor of production has assumed a pivotal role in driving digital economic development The acquisition of such data is particularly important for contemporary decision making models Data markets facilitate the procurement of high quality data and thereby enhance the data supply Consequently potential data sellers with high quality data are incentivized to enter the market an aspect that is particularly relevant in data scarce domains such as personalized medicine and services Data scientists have a pivotal role to play in both the intellectual

vitality and the practical utility of high quality data Moreover data quality control presents opportunities for data scientists to engage with less structured or ambiguous problems The book will foster fruitful discussions on the contributions that various scientists and engineers can make to data quality and the further evolution of data markets *Sacred Bovines* Douglas Allchin, 2017-06-16 This book is a collection of short essays each challenging a commonplace assumption about biology playfully dubbed *Sacred Bovines* *Bad Pharma* Ben Goldacre, 2013 Following the bestselling *Bad Science* which mercilessly exposed the evils of bogus pseudo scientific remedies Ben Goldacre puts the global pharmaceutical industry under the microscope *The Writers Directory*, 2013 **Follow the Science** Sharyl Attkisson, 2024-09-03 Emmy Award winning investigative journalist and New York Times bestselling author Sharyl Attkisson exposes the corruption that has ruled the pharmaceutical industry for decades Through blatant lies deep cover ups and high level collusion with government and media Big Pharma has continuously put profits over people with dangerous results Now with her signature investigative rigor and uncompromising commitment to the facts Sharyl Attkisson takes readers on an shocking journey through the dark underbelly of the pharmaceutical industry Follow the Science recounts in exacting detail how far the pharmaceutical industry and its supporters in medicine media and government will go to protect their profits Attkisson provides shocking examples that reveal the disturbing callousness our government public health officials and top researchers are capable of when it comes to the most vulnerable among us And she explains in a graphic sense how some of the most trusted within our society are willing to commit life threatening ethics violations When caught they circle the wagons and marshal forces to defend their bad acts and take steps to cruelly silence the injured and smear those who would expose them This book includes exclusive eye opening evidence including Financial ties between well known vaccine promoters and the vaccine industry Outrageous collusion between the news media and Big Pharma How Big Pharma teaches slanted information to med students and doctors Government officials secretly admitting vaccines caused some cases of autism The first child seriously injured by Covid vaccines while in Pfizer s study The secretive money backing seemingly independent studies and nonprofits Follow the Science will challenge your assumptions open your eyes and inspire you to take action With its powerful message of truth and justice this book is a must read for anyone who cares about the future of our healthcare system and their own family s health

Sickening John Abramson, 2022-02-08 The inside story of how Big Pharma s relentless pursuit of ever higher profits corrupts medical knowledge misleading doctors misdirecting American health care and harming our health The United States spends an excess 1.5 trillion annually on health care compared to other wealthy countries yet the amount of time that Americans live in good health ranks a lowly 68th in the world At the heart of the problem is Big Pharma which funds most clinical trials and therefore controls the research agenda withholds the real data from those trials as corporate secrets and shapes most of the information relied upon by health care professionals In this no holds barred exposé Dr John Abramson one of the foremost experts on the drug industry s deceptive tactics combines patient stories with what he learned during many

years of serving as an expert in national drug litigation to reveal the tangled web of financial interests at the heart of the dysfunction in our health care system For example one of pharma s best kept secrets is that the peer reviewers charged with ensuring the accuracy and completeness of the clinical trial reports published in medical journals do not even have access to complete data and must rely on manufacturer influenced summaries Likewise for the experts who write the clinical practice guidelines that define our standards of care The result of years of research and privileged access to the inner workings of the U S medical industrial complex Sickening shines a light on the dark underbelly of American health care and presents a path toward genuine reform 2016, 00 0000 The Truth About the Drug Companies Marcia Angell,2004-08-24 During her two decades at The New England Journal of Medicine Dr Marcia Angell had a front row seat on the appalling spectacle of the pharmaceutical industry She watched drug companies stray from their original mission of discovering and manufacturing useful drugs and instead become vast marketing machines with unprecedented control over their own fortunes She saw them gain nearly limitless influence over medical research education and how doctors do their jobs She sympathized as the American public particularly the elderly struggled and increasingly failed to meet spiraling prescription drug prices Now in this bold hard hitting new book Dr Angell exposes the shocking truth of what the pharmaceutical industry has become and argues for essential long overdue change Currently Americans spend a staggering 200 billion each year on prescription drugs As Dr Angell powerfully demonstrates claims that high drug prices are necessary to fund research and development are unfounded The truth is that drug companies funnel the bulk of their resources into the marketing of products of dubious benefit Meanwhile as profits soar the companies brazenly use their wealth and power to push their agenda through Congress the FDA and academic medical centers Zeroing in on hugely successful drugs like AZT the first drug to treat HIV AIDS Taxol the best selling cancer drug in history and the blockbuster allergy drug Claritin Dr Angell demonstrates exactly how new products are brought to market Drug companies she shows routinely rely on publicly funded institutions for their basic research they rig clinical trials to make their products look better than they are and they use their legions of lawyers to stretch out government granted exclusive marketing rights for years They also flood the market with copycat drugs that cost a lot more than the drugs they mimic but are no more effective The American pharmaceutical industry needs to be saved mainly from itself and Dr Angell proposes a program of vital reforms which includes restoring impartiality to clinical research and severing the ties between drug companies and medical education Written with fierce passion and substantiated with in depth research The Truth About the Drug Companies is a searing indictment of an industry that has spun out of control
