Intrapersonal communication has been considered and studied less in comparison to general communication and other related topics. Moreover, intrapersonal communication is usually mentioned in the context of studying other topics, as opposed to being studied singularly. To fully understand the complexity and potential uses of this field of study, intrapersonal communication must be researched further. *A Social-Scientific Examination of the Dynamics of Communication, Thought, and Selves* focuses on the concept of intrapersonal communication, discusses how and why we communicate with ourselves, and considers how scholars can help humans improve and harness intrapersonal communication in fields such as artificial intelligence. The book also makes a forceful case for the importance and potential utility of intrapersonal communication. Covering topics such as language, sociology, and cognitive science, this reference work is ideal for sociologists, psychologists, industry professionals, academicians, scholars, researchers, practitioners, instructors, and students.
