Tau is well known as a microtubule associated protein that is predominantly localized in the axons of neurons. In various forms of brain disease neuronal loss occurs with deposition of hyperphosphorylated tau in the remaining neurons. Important questions remain regarding the way in which tau forms hyperphosphorylated and fibrillar deposits in neurons and whether tau aggregation represents the toxic pathway leading to neuronal death. With the help of new technologies researchers are now solving these long standing questions. In this book readers will find the latest expert knowledge on all aspects of tau biology including the structure and role of the tau molecule, tau localization and function, the pathology drivers and markers of tauopathies, tau aggregation and treatments targeting tau. *Tau Biology* will be an invaluable source of information and fresh ideas for those involved in the development of more effective therapies and for all who seek a better understanding of the biology of the aging brain. **Cumulated Index Medicus**, 1984 **Scientific and Technical Aerospace Reports**, 1992 **The Journal of Cell Biology**, 2005 No 2 pt 2 of November issue each year from v 19 1963 47 1970 and v 55 1972 contain the Abstracts of papers presented at the Annual Meeting of the American Society for Cell Biology 3d 1963 10th 1970 and 12th 1972 *Applied Science & Technology Index*, 1996 *Dissertation Abstracts International*, 1988 **University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles** University of California (System).
