

Use PM Report Form

A planned maintenance program of regular, routine inspections and lubrication is important for long life and troublefree operation of your lift truck. Make and keep records of your inspections. Use these records to help establish the correct PM intervals for your application and to indicate maintenance required to prevent major problems from occurring during operation.

As an aid in performing and documenting your PM inspections, Clark has prepared an Electric Truck Planned Maintenance Report form. Copies of this form may be obtained from your authorized Clark dealer. We recommend that you use this form as a checklist, to make a record of **your inspection and truck condition**.

The periodic maintenance procedures outlined in this manual are intended to be used with the PM report form. They are arranged in groupings of maintenance work that are done in a logical and efficient sequence.

A check mark or entry is made on the PM Report Form when the PM is performed. Please note the special coding system for indicating the importance of needed repairs and/or adjustments.

When you have finished the PM procedure, give a copy of the report of the designated authority to the person responsible for lift truck maintenance.

Do not make repairs or adjustments unless authorized to do so.

For safety:

- Remove all jewelry (watch, rings, bracelets, etc.) before working on the truck.
- Disconnect battery from truck receptacle before working on electrical components.
- Wear safety glasses. Wear a safety (hard) hat in industrial plants and in special work areas where protection is necessary or required.

How to Perform the PM Periodic Inspections and Maintenance

Visual Inspection

Perform a visual inspection of the lift truck and its components. Walk around the truck and take note of any obvious damage and maintenance problems. Check for loose fasteners and fittings.

Be sure all capacity, safety, and warning plates or decals are attached and legible.

CAUTION

Do not operate a lift truck with damaged or missing decals and nameplates. Replace them immediately. They contain important information.

Inspect the truck for signs of external leakage of transmission, engine oil, or hydraulic fluid. Check for hydraulic leaks and loose fittings. DO NOT use bare hands to check. Hydraulic fluid may be hot or under pressure.

DANGER

HYDRAULIC FLUID PRESSURE: Do not use your hands to check for hydraulic leakage. Fluid under pressure can penetrate your skin and cause serious injury.

Be sure that the driver's overhead guard, load backrest extension, finger guards, and any other safety devices are in place, undamaged, and attached securely.

WARNING

For trucks equipped with spark-enclosed (EE) construction, or with polyurethane
