College Reading Janet Maker, Minnette Lenier, 1986 **Corpus Stylistics as Contextual Prosodic Theory and Subtext** Bill Louw, Marija Milojkovic, 2016-05-25 The volume presents Louw's Contextual Prosodic Theory from its beginnings to its newest applications. It journeys from delexicalisation and relexicalisation into Semantic Prosody and then to the heart of its contextual requirements within collocation and the thinking of J. R. Firth. Once there it moves much of Firth's and Malinowski's thinking into a computational method based upon the ability of language to govern and analyse itself using collocation to plot its scope and limits. With the assistance of analytic philosophy it parts logic grammar from metaphysics vocabulary along the lines of a non-computational formula of Bertrand Russell and so falsifies the major premise of the Vienna Circle using its own central tenet the Principle of Verification. Having arrived at corpus-derived subtext the semantic aura of grammar strings as distinguished from Semantic Prosody the second half of the book proceeds to verify the theory on Slavic languages. The focus is on the poet Alexander Pushkin whose authorial intention becomes computationally recoverable. Prose is handled on samples authored by David Lodge where authorial sincerity Louw 1993 is viewed on a cline of inspiration and quality of discourse. Other applications in the volume include studies on translation negotiation humour and the reception of CPT.
