## **Denver Post Amendment Guide:**

**Tax Crusaders and the Politics of Direct Democracy** Daniel A. Smith, 2013-11-15 Daniel A Smith exposes the truth about the American tax revolt Contrary to conventional wisdom recent ballot initiatives to limit state taxes have not been the result of a groundswell of public outrage rather they have been carefully orchestrated from the top down by professional tax crusaders political entrepreneurs with their own mission These faux populist initiatives in contrast to genuine grassroots movements involve minimal citizen participation Instead the tax crusaders hire public relations firms and use special interest groups to do the legwork and influence public opinion Although they successfully tap into the pervasive anti tax public mood by using populist rhetoric these organizations serve corporate interests rather than groups of concerned neighbors The author shows that direct democracy can ironically lead to diminished public involvement in government Smith looks at the key players following the trail of money and power in three important initiatives Proposition 13 in California 1978 Proposition 2 1 2 in Massachusetts 1980 and Amendment 1 in Colorado 1992 He provides a thorough history of tax limitation movements in America showing how direct democracy can be manipulated to subvert the democratic process and frustrate the public good

**Reforming Legislatures** Peverill Squire, 2024-06-26 Winner of the 2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people s thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress s structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures The data examined here look at how people have voted on more

than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time The findings reported paint a more nuanced picture of Americans attitudes toward legislatures than the prevailing one derived from survey research When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers motives and behaviors
