**Notes on Linguistics**, 1998 **Africa's Endangered Languages** Jason Kandybowicz, Harold Torrence, 2017-07-10 Relatively little is known about Africa's endangered languages Unlike indigenous languages in Australia North Asia and the Americas which are predominantly threatened by colonizers African languages are threatened most immediately by other local languages As a result the threat of language extinction is perceived as lower in Africa than in other parts of the globe and a disproportionate amount of research is devoted to the study of endangered African languages when compared to any other linguistically threatened region in the world There are approximately 308 highly endangered languages spoken in Africa roughly 12% of all African languages and at least 201 extinct African languages This volume hopes to illuminate and challenge this trend Chapters offer both documentary and theoretical perspectives emphasizing the symbiotic relationship between the two approaches and its implications for the preservation of endangered languages both in the African context and more broadly Documentary oriented chapters deal with key issues in African language documentation including language preservation and revitalization community activism and data collection and dissemination methodologies among others Theoretically oriented chapters provide detailed descriptions and analyses of phonetic phonological morphological syntactic and semantic phenomena and connect these to current theoretical issues and
