

This publication describes all steps to arrive at a cycle-friendly infrastructure, from the policy proposal to promote cycling to the physical implementation of measures. Cycle infrastructure is taken to mean all technical facilities intended for cyclists.

Traffic handbooks provide guidelines for designing cycle infrastructure. Which is useful, but they also have the following drawbacks:

- They provide examples and/or templates which encourage their use without reflection.
- They strive towards integration with requirements set by other modes of transport, which results in compromises being made at an early stage.

In order to avoid these drawbacks, the present publication aims to encourage designers to heed the following recommendations during every assignment and at each stage of the process:

- Put yourself in the shoes of the cyclist as future user of the design, also taking into account vulnerable groups of cyclists, such as children and the elderly.
- Ensure that facilities fulfil the policy objectives so that they support the policy.
- Devote attention to the (spatial planning) integration of cycle facilities in the surrounding area.
- See to it that the function, design and use of infrastructure are in equilibrium.

Design Manual For A Bicycle Friendly Infrastructure:

Sign Up for the Bike Centre for Research and Contract Standardization in Civil Engineering,1993 **Sign Up for the Bike** ,1993 **Sustainable Transport** Rodney Tolley,2003-09-10 With a wide range of contributions from America Australia Europe as well as the UK Creating Sustainable Transport sums up many of the lessons learned and how they can be applied in improved planning Non motorized transport planning depends on combining improvements to infrastructure with education The book examines both national strategies and local initiatives in cities around the world including such topics as changes to existing road infrastructure and the integration of cycling and walking with public transport The contributors consider topics such as developing healthier travel habits and ways of promoting cycling and walking as alternatives to the car *Pedestrian Facilities Users Guide: Providing Safety and Mobility* Charles V. Zegeer,2002 This guide is intended to provide information on how to identify safety and mobility needs for pedestrians with the roadway right of way Useful for engineers planners safety professionals and decision makers the guide covers such topics as the Walking Environment including sidewalks curb ramps crosswalks roadway lighting and pedestrian over and under passes Roadway Design including bicycle lanes roadway narrowing reducing the number of lanes one way two way streets right turn slip lanes and raised medians Intersections with roundabouts T intersections and median barriers and Traffic calming designs

Cycle-friendly Infrastructure ,1996 City Cycling John Pucher,Ralph Buehler,2012-10-19 A guide to today s urban cycling renaissance with information on cycling s health benefits safety bikes and bike equipment bike lanes bike sharing and other topics Bicycling in cities is booming for many reasons health and environmental benefits time and cost savings more and better bike lanes and paths innovative bike sharing programs and the sheer fun of riding City Cycling offers a guide to this urban cycling renaissance with the goal of promoting cycling as sustainable urban transportation available to everyone It reports on cycling trends and policies in cities in North America Europe and Australia and offers information on such topics as cycling safety cycling infrastructure provisions including bikeways and bike parking the wide range of bike designs and bike equipment integration of cycling with public transportation and promoting cycling for women and children City Cycling emphasizes that bicycling should not be limited to those who are highly trained extremely fit and daring enough to battle traffic on busy roads The chapters describe ways to make city cycling feasible convenient and safe for commutes to work and school shopping trips visits and other daily transportation needs The book also offers detailed examinations and illustrations of cycling conditions in different urban environments small cities including Davis California and Delft the Netherlands large cities including Sydney Chicago Toronto and Berlin and megacities London New York Paris and Tokyo These chapters offer a closer look at how cities both with and without historical cycling cultures have developed cycling programs over time The book makes clear that successful promotion of city cycling depends on coordinating infrastructure programs and government policies *The Greening of Urban Transport* Rodney Tolley,1997-10-28 The first edition of this volume has been the bible of

environmentally sensitive transport planning in Western cities This new edition takes account of recent changes and developments in planning practice *Environmental Issues Planning and Transport Research and Computation* (International) Co. Mahmassani,1998 This report addresses an important need for fundamental understanding of bicycle automobile mixed traffic It presents models of 1 gap acceptance behavior and 2 bicyclist behavior at the onset of a yellow traffic signal indication in addition to analysis of 3 coordinating traffic signals to provide progression for both bicycles and automobiles Fundamental insights into mixed traffic behavior are derived and applied to selected problems in mixed traffic engineering and operations Discrete choice probit models are developed for both motorist and cyclist gap acceptance behavior An important fundamental insight from these models is that both cyclists and motorists require a longer gap when the gap is closed by a large vehicle e g bus and both will accept a shorter gap when the gap is closed by a bicycle relative to a gap closed by a passenger car A methodology for determining an adequate clearance interval for bicycles is developed from a deterministic model based on kinematic relations The bicyclists behavior at the onset of a yellow signal indication are obtained Finally a conceptual foundation consisting of three primary contributions is developed for analyzing bicycle automobile mixed traffic progression along signalized streets **Motor Vehicles in the Environment** Paul Nieuwenhuis,Peter E. Wells,Peter Wells,1994 The motor industry is the largest manufacturing industry in the European Community US and Japan yet its products are among the most environmentally damaging Although public opinion in much of the industrialised world has turned green confusion still remains as to the implications for the motor industry Will the car survive and if so in what form Can we afford to do without the motor industry and can we distribute our goods without tracks Motor Vehicles in the Environment highlights a number of issues which form the basis of future legislation affecting the motor industry It offers a series of perspectives ranging from green governmental economic and marketing issues to the impact on a specific sector of the industry Prominent international experts analyse the implications of the green revolution for their specialist fields and areas of interest **Road & Transport Research** ,1998 **Guidebook on Methods to Estimate Non-motorized Travel: Supporting documentation** ,1999 **Copenhagenize** Mikael Colville-Andersen,2018-03-29 Urban designer Mikael Colville Andersen draws from his experience working for dozens of cities around the world on bicycle planning strategy infrastructure design and communication In Copenhagenize he shows cities how to effectively and profitably re establish the bicycle as a respected accepted and feasible form of transportation Building on his popular blog of the same name Copenhagenize offers entertaining stories vivid project descriptions and best practices alongside beautiful and informative visuals to show how to
