Advanced AI Methods for Plant Disease and Pest Recognition Jucheng Yang,Yalin Wu,Alvaro Fuentes,Sook Yoon,Tonghai Liu,2024-06-06 Plant diseases and pests cause significant losses to farmers and threaten food security worldwide Monitoring the growing conditions of crops and detecting plant diseases is critical for sustainable agriculture Traditionally crop inspection has been carried out by people with expert knowledge in the field However regarding any activity carried out by humans this activity is prone to errors leading to possible incorrect decisions Innovation is therefore an essential fact of modern agriculture In this context deep learning has played a key role in solving complicated applications with increasing accuracy over time and recent interest in this type of technology has prompted its potential application to address complex problems in agriculture such as plant disease and pest recognition Although substantial progress has been made in the area several challenges still remain especially those that limit systems to operate in real world scenarios

Advanced Biophysical Techniques in Biosciences Nirmal Mazumder,Rajib Biswas,Guan-Yu Zhuo,2025-09-26 This book presents an overview of advanced biophysical techniques that can be used to understand the physicochemical properties of biomolecules and biomaterials and expand their potential for biomedical applications It is split into two parts the first covering advanced biophysical techniques and the second covering bioscience applications Adequate knowledge about the behavior of biomacromolecules is essential for standardizing their applications in various industries These properties are strongly influenced by the composition chain structure e g linear or branch linkage patterns and molecular weight of the biomolecules This book describes the various internal and external factors that develop the structural and functional properties of biomolecules Further it covers the advanced techniques that can be used to discover and enhance these properties such as scanning electron microscopy SEM Fourier transform infrared FTIR spectroscopy X ray crystallography fluorescence spectroscopy surface plasmon resonance surface enhanced Raman spectroscopy force spectroscopy optical tweezers and more It also covers high performance liquid chromatography for biomolecule detection including sample preparation column selection mobile phase determination and the choice of an appropriate detector for the investigation This book serves as a modern resource on the topic providing an in depth analysis of various important physicochemical properties as well as their wide range of applications including in pharmaceuticals bioimaging sensing cancer therapy food sciences textiles scaffolds drug delivery and tissue engineering Readers are presented with several invasive and non invasive techniques that can be used for the characterization of biomacromolecules along with many types of physical chemical and physicochemical modifications that can be used to enhance their usage
