Carolina English Edition:

The History of Louisiana: Of the Western Parts of Virginia and Carolina Le Page Du Pratz, 1925-01-01 The History of Louisiana which we here present to the public was wrote by a planter of sixteen years experience in that country who had likewise the advantage of being overseer or director of the public plantations both when they belonged to the company and afterwards when they fell to the crown by which means he had the best opportunities of knowing the nature of the soil and climate and what they produce or what improvements they are likely to admit of a thing in which this nation is without doubt highly concerned and interested And when our author published this history in 1758 he had likewise the advantage not only of the accounts of F Charlevoix and others but of the Historical Memoirs of Louisiana published at Paris in 1753 by Mr Dumont an officer who resided two and twenty years in the country and was personally concerned and acquainted with many of the transactions in it from whom we have extracted some passages to render this account more complete But whatever opportunities our author had of gaining a knowledge of his subject it must be owned that he made his accounts of it very perplexed By endeavoring to take in every thing he descends to many trifles and by dwelling too long on a subject he comes to render it obscure by being prolix in things which hardly relate to what he treats of He interrupts the thread of his discourse with private anecdotes long harangues and tedious narrations which have little or no relation to the subject and are of much less consequence to the reader The want of method and order throughout the whole work is still more apparent and that joined to these digressions renders his accounts however just and interesting so tedious and irksome to read and at the same time so indistinct that few seem to have reaped the benefit of them For these reasons it was necessary to methodize the whole work to abridge some parts of it and to leave out many things that appear to be trifling This we have endeavored to do in the translation by reducing the whole work to four general heads or books and by bringing the several subjects treated of the accounts of which lie scattered up and down in different parts of the original under these their proper heads so that the connection between them and the accounts of any one subject may more easily appear This it is presumed will appear to be a subject of no small consequence and importance to this nation especially at this time The countries here treated of have not only by right always belonged to Great Britain but part of them is now acknowledged to it by the former usurpers and it is to be hoped that the nation may now reap some advantages from those countries on which it has expended so many millions which there is no more likely way to do than by making them better known in the first place and by learning from the experience of others what they do or are likely to produce that may turn to account to the nation It has been generally suspected that this nation has suffered much from the want of a due knowledge of her dominions in America which we should endeavor to prevent for the future If that may be said of any part of America it certainly may of those countries which have been called by the French Louisiana They have not only included under that name all the western parts of Virginia and Carolina and thereby imagined that they had from this nominal title a just right to those antient dominions of the crown of

Britain but what is of worse consequence perhaps they have equally deceived and imposed upon many by the extravagant hopes and unreasonable expectations they had formed to themselves of the vast advantages they were to reap from those countries as soon as they had usurped them which when they came to be disappointed in they ran from one extreme to another and condemned the country as good for nothing because it did not answer the extravagant hopes they had conceived of it and we seem to be misled by their prejudices and to be drawn into mistakes by their artifice or folly Because the Mississippi scheme failed in 1719 every other reasonable scheme of improving that country and of reaping any advantage from it must do the same It is to wipe off these prejudices that the following account of these countries which appears to be both just and reasonable and agreeable to every thing we know of America may be the more necessary We have been long ago told by F Charlevoix from whence it is that many people have formed a contemptible opinion of this country that lies on and about the Mississippi They are misled says he by the relations of some seafaring people and others who are no manner of judges of such things and have never seen any part of the country but the coast side about Mobile and the mouths of the Mississippi which our author here tells us is as dismal to appearance the only thing those people are capable of judging of as the interior parts of the country which they never saw are delightful fruitful and inviting They tell us besides that the country is unhealthful because there happens to be a marsh at the mouth of the Mississippi and what river is there without one which they imagine must be unhealthful rather than that they know it to be so not considering that all the coast both of North and South America is the same and not knowing that the whole continent above this single part on the coast is the most likely from its situation and has been found by all the experience that has been had of it to be the most healthy part of all North America in the same climates as will abundantly appear from the following and all other accounts The Carolina Medical Journal ,1905 **A New Voyage to Carolina** John Lawson,2000-11-15 John Lawson s amazingly detailed yet lively book is easily one of the most valuable of the early histories of the Carolinas and it is certainly one of the best travel accounts of the early eighteenth century colonies An inclusive account of the manners and customs of the Indian tribes of that day it is also a minute report of the soil climate trees plants animals and fish in the Carolinas Lawson s observation is keen and thorough his style direct and vivid He misses nothing and recounts all from the storms at sea to his impressions of New York in 1700 the trip down the coast to Charleston and his travels from there into North Carolina with his Indian guides The first edition of this work was published in London in 1709 While various editions followed in the eighteenth century including two in German this edition is a true copy of the original and is the first to include a comprehensive index It also contains The Second Charter An Abstract of the Constitution of Carolina Lawson s will and several previously unpublished letters written by Lawson A number of DeBry woodcuts of John White s drawings of Indian life sketches of the beasts of Carolina which appeared in the original 1709 edition and Lawson s map contribute additional interest to this volume *North Carolina University Magazine* ,1858 "A" Bibliography of the Historical Literature of North Carolina Stephen B.
