and personal assistant as they venture down a road frequently but silently traveled A distinctive Winnebago transports her
through three New England states on a unique book signing tour as she exhibits hope After unexpectedly becoming a widow
in response to her tragedy she published a moving memoir about her marriage and journey of loss Due to shared experience
she connected with readers and they revealed that her book had the power to heal She was then driven to encourage others
to unlock the vault of pain in which they were trapped Laugh cry and witness courage and strength in finding life again Take
an enchanting stroll down memory lane get a glimpse of how tragedy changes her experience the mystical gifts from loved

of medium heavy tank gun systems used from World War I to World War II Much has been written about the use of tanks in
battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the
main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of
World War II in 1945 including tanks of the interwar period Specifically considered are guns of a caliber greater than thirty
five mm which have been deployed in numbers greater than one hundred The emphasis is on guns mounted in turrets on
heavier tracked armored fighting vehicles greater than fifteen tonnes which were considered tanks There are though
exceptions in that the naval six pounder guns in First World War British tanks as well as the seventy five mm guns in French
medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control
equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle
breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading
ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the
munitions available that must be absorbed by the gun recoil system *Moody's Industrial Manual* ,1927 The National
