M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4 speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided so you can positively identify the cases, shafts and related parts. It discusses available models, parts, options and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight and achieving race specific clearances. Muncie 4 speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high performance engine that far exceeds stock horsepower, a stronger high performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4 speed, available parts, selection of gear ratios and the rebuild process.

*Integrated Management of Technical Documentation* Jirka Hoppe, 2012-12-06

Writing documentation is an integral part of any technical product development. A significant amount of time is spent describing the product functionality, giving insights into technical details, providing maintenance instructions, specifying marketing information, writing user manuals, etc. As the creation of such documentation is generally a source of higher production costs, many large companies are realising the need to increase the efficiency of documentation handling. Simple documents consisting of only a few pages can be developed on simple systems. Basic components of such systems are an editor handling text and graphics, file storage and a printer.
