Repère, 2008 **Point de repère**, 2001 *The Framework for Innovation* Frank Voehl, H. James Harrington, Rick Fernandez, Brett Trusko, 2018-12-14

The innovation infrastructure and master plan described in this book offers a detailed and comprehensive approach to one of the most difficult and challenging problems facing entrepreneurs involved in innovation at any scale enterprise the problem of how to govern your organization s innovation initiatives in the middle of turbulent change Progress in any field requires the development of a framework a structure that organizes the accumulating knowledge enables people to master it and unifies the key discoveries into a set of principles that makes them understandable and actionable For starters successful innovation requires an integrated design process beginning with integration in the design of the enterprise the design of the product along with the design and implementation of new technologies Such an integrated design effort requires good collaboration and management of the design framework and should be supported by efficient knowledge management techniques and tools If innovation is to help a business grow and improve its competitiveness it is also important to plan the innovation carefully This book provides a holistic multidisciplinary framework that will enable your organization and its leaders to take a strategic approach to innovation The framework combines non traditional creative approaches to business innovation with conventional strategy development models The framework model brings together perspectives from many complementary disciplines the non traditional approaches to innovation found in the business creativity movement multiple source strategy consulting the new product development perspective of many leading industrial design firms qualitative consumer customer research future based research found in think tanks and traditional scenario planning and organizational development OD practices that examine the effectiveness of an organization s culture processes and structure Though some ideas may just fall from the sky or come out of the blue an organization should also have a strategic vision of how the business and the enterprise will successfully develop It should not just wait for the innovation to arrive arbitrarily but rather proactively plan for innovation incorporating market trends the competitive landscape new technology availability and changes in customer preferences and trends in order to create a flexible in house innovation process Such an enterprise will also pro actively manage the knowledge supply chain that supports innovation as outlined in this book 7 of Management Handbook for Results series The framework outlined in this handbook consists of a well integrated cohesive set of practices that inspires imaginative innovation teams to look beyond the obvious and explore a broad range of possibilities to identify significant opportunities and make informed decisions about the most promising paths to pursue The goal is to create a shared vision for growth along with defining pragmatic action plans that bridge from the future back to the present while attempting to align the organization around the requirements for success

Innovations, 2010-02-19 Dans les nouvelles approches de l'innovation l'entrepreneur et l'entreprise sont appréhendés à travers leurs compétences et leur fonction de création de ressources l'innovation devient ainsi endogène graduelle ou

radicale intègre dans un processus complexe avec de nombreuses rétroactions et interactions. Les auteurs présentent l'organisation innovante comme un système dynamique composé de compétences particulières et diversifiées. Par l'acquisition, la combinaison et la mobilisation de ces compétences, l'agent innovateur peut créer des ressources technologiques et faire valuer les relations avec son environnement. D'où l'importance du management de la conception de l'application et du développement dans la mise en œuvre d'un processus d'innovation. Ce numéro d'Innovations est consacré au mouvement interactif entre le management des organisations innovantes et le contexte économique lui-même défini par un climat des affaires particulier. Un moment historique donne. Trois dimensions significatives permettent de caractériser l'environnement de l'innovation : des organisations, l'environnement technologique au niveau de l'industrie et du territoire, le contexte de concurrence, de coopération, de réseaux et des normes qui en découlent, l'environnement politique et institutionnel axé prioritairement sur les mesures incitatives et de régulation.

Gestion de l'innovation Thomas LOILIER, Albéric TELLIER, 2013-08-21. La capacité d'innovation est l'une des clés de la compétitivité de l'entreprise. Dans un contexte de plus en plus exigeant, se développe un ensemble de concepts, de théories et de démarches visant mieux à comprendre et à gérer l'innovation. La gestion de l'innovation se situe à la croisée de la stratégie du marketing, du droit de la propriété intellectuelle et du management des organisations. Les objectifs de cet ouvrage consistent à présenter les différentes problématiques de la gestion de l'innovation. À quel moment faut-il innover ? Comment bâtir une stratégie fondée sur l'innovation ? Comment peut-on favoriser la diffusion de l'innovation ? Comment la protéger ? Existe-t-il des dispositifs organisationnels propices à l'innovation ? Sur quels leviers convient-il de s'appuyer ? Comment bâtir un écosystème propice ? Comment inciter les membres de l'organisation à proposer des idées nouvelles ? Comment gérer un projet d'innovation ? Dans quelle mesure la capacité d'innovation de l'entreprise passe-t-elle par la recherche active de partenaires ? Pourquoi et comment mettre en place un modèle d'innovation ouverte ? Sur ces questions, l'ouvrage apporte une vision synthétique des connaissances accumulées, présente les avancées les plus récentes et souligne les exigences, parfois contradictoires, de l'innovation. 135 encadrés permettent de définir précisément les notions fondamentales et de fournir de nombreux exemples. Vritable outil de réflexion, cet ouvrage s'adresse aux étudiants en gestion, management 2^e et 3^e cycles universitaires, écoles de commerce, programmes doctoraux, mais aussi aux décideurs et tous les acteurs concernés par les projets d'innovation : dirigeants d'entreprises, ingénieurs de R&D, chefs de projet, consultants, responsables marketing.

S'engager dans un processus d'innovation représente un défi pour la PME car pour atteindre ses objectifs, elle doit quotidiennement composer avec des ressources limitées. Le dilemme de l'innovateur, soit la recherche du nécessaire équilibre entre les activités d'innovation par exploitation et celles effectuées par exploration, est galement une situation de plus en plus connue des acteurs.
