This SAE Standard covers military engine oils suitable for preservation break in and lubrication of reciprocating internal combustion engines of both spark ignition and compression ignition types and of power transmission fluid applications in equipment used in combat tactical service see 7 1 This document is equivalent to MIL L 21260 when all requirements are met SAE J2361 was originally issued November 1998 as a means to leverage non government standard organizations such as SAE to better align military needs with commercial manufacturers and suppliers Unfortunately because of the relatively rapid changes in the API heavy duty diesel engine oil service categories mainly driven by emission requirements the commercial and military requirements have become increasingly out of sync This inconsistency has led to very little interest among industry and support of these documents Furthermore because of military uniqueness of the requirements the administration of these documents is most efficiently handled within the Department of Defense under current procedures for military performance requirements specifications **Precautionary Advice on the Handling of Used Engine Oils** Rainer Kahsnitz,CONCAWE.
