## Friction

1. A crate filled with delicious junk food rests on a horizontal floor. Only gravity and the support force of the floor act on it, as shown by the vectors for weight  $W$  and normal force  $n$ .

- The net force on the crate is (zero) (greater than zero).
- Evidence for this is no acceleration.

2. A slight pull  $P$  is exerted on the crate, not enough to move it.

- The force of friction  $f$  acting on the crate is (less than) (equal to) (greater than)  $P$ .
- The net force on the crate is (zero) (greater than zero).

3. Pull  $P$  is increased until the crate begins to move. It is pulled so that it moves with constant velocity across the floor.

- Friction  $f$  is (less than) (equal to) (greater than)  $P$ .
- Constant velocity means acceleration is (zero) (greater than zero).
- The net force on the crate is (less than) (equal to) (greater than) zero.

4. Pull  $P$  is further increased and is now greater than friction  $f$ .

- The net force on the crate is (less than) (equal to) (greater than) zero.
- The net force acts toward the right, so acceleration acts toward the (left) (right).

- If the pulling force  $P$  is 150 N and the crate doesn't move, what is the magnitude of  $f$ ? 150 N
- If the pulling force  $P$  is 200 N and the crate doesn't move, what is the magnitude of  $f$ ? 200 N
- If the force of sliding friction is 250 N, what force is necessary to keep the crate sliding at constant velocity? 250 N
- If the mass of the crate is 50 kg and sliding friction is 250 N, what is the acceleration of the crate when the pulling force is 250 N? 0 m/s<sup>2</sup> 300 N? 1 m/s<sup>2</sup> 500 N? 5 m/s<sup>2</sup>

**Conceptual Physics** Paul G. Hewitt, 2000-06 **University Physics: Australian edition** Hugh D. Young, Roger A. Freedman, Ragbir Bhathal, 2010-08-04 This book is the product of more than half a century of leadership and innovation in physics education. When the first edition of *University Physics* by Francis W. Sears and Mark W. Zemansky was published in 1949, it was revolutionary among calculus-based physics textbooks in its emphasis on the fundamental principles of physics and how to apply them. The success of *University Physics* with generations of several million students and educators around the world is a testament to the merits of this approach and to the many innovations it has introduced. Subsequently, in preparing this First Australian SI edition, our aim was to create a text that is the future of Physics Education in Australia. We have further enhanced and developed *University Physics* to assimilate the best ideas from education research with enhanced problem-solving instruction, pioneering visual and conceptual pedagogy, the first systematically enhanced problems, and the

Keeping Those Words in Mind Max Louwerse,2021-07-15 How can humans keep thousands of words in mind and have no difficulty understanding trillions of sentences The answer to this question might lie in parents teaching their children language skills or in in the human brain which may be equipped with a language instinct or maybe in impressive memory skills that link words to their perceptual information Undoubtedly there is some truth to some of these explanations But one answer perhaps the most important answer has been largely ignored Keeping Those Words in Mind tries to remedy this oversight Linguist and cognitive psychologist Max Louwerse PhD argues that understanding language is not just possible because of memory brains environment and computation but because of the patterns in the sequence of sounds and words themselves He demonstrates that what seems to be an arbitrary communication system with arbitrary characters and sounds that become words and arbitrary meanings for those words actually is a well organized system that has evolved over tens of thousands of years to make communication as efficient as it is What is needed for humans to acquire language is for humans to recognize and discover the patterns in our communication system By examining how our brains process language and find patterns the intricacies of the language system itself and even scientific breakthroughs in computer science and artificial intelligence Keeping Those Words in Mind brings a brand new and interdisciplinary explanation for our ability to extract meaning from language     Comparative Study Using Technology Vs Traditional Learning in High School Conceptual Physics
