Lack of patience also causes negative behaviors related to trading such as not bothering to back test the system, not keeping careful records, and not doing an end of day or end of week analysis of trading results to find areas of improvement. The feeling of things not moving fast enough also causes traders to add too many trading systems to an already overloaded brain and not be able to focus properly on any one strategy to make it profitable. The profitability of the trading system is profoundly impacted by these types of behaviors and turns what is a money making system in theory into a loss making system in the real life.
