Conventional And Non Conventional Interventions In Crop Improvment:

Conventional and Non-conventional Interventions in Crop Improvement C P Malik, Gulzar S Sanghera, Shabir H Wani, 2013 Breeding for Enhanced Nutrition and Bio-Active Compounds in Food Legumes Debjyoti Sen Gupta, Sanjeev Gupta, Jitendra Kumar, 2021-01-18 More than 20 million childhood deaths occur every year due to the micronutrient deficiency and diet related non communicable diseases cardiovascular diseases cancers chronic respiratory diseases and diabetes The United Nations UN recently announced that the increase in chronic non communicable diseases has resulted in 36 million deaths around the world annually claiming more lives than all other causes combined These chronic diseases are not isolated to developed countries and are even more pronounced in the developing world Such chronic illnesses have caused far more deaths than infectious diseases throughout the world except Africa in recent years Therefore enrichment of micronutrients in staple food crops is of paramount importance for the nutritional security in our world Biofortification is the development of micronutrient and or vitamin rich crops using traditional crop improvement practices as well as modern biotechnology tools It is a more sustainable and cost effective method than food supplementation fortification and diet diversification This work consolidates available information on the different aspects of breeding for improved nutrition of pulses An overview of entire pulses based on their nutritional profile is given so that audience can find the desired information easily Food legumes are the active ingredients in many gluten free food products and there is a continuous rise of the use of pulses flour in milling and baking processes Our book sheds light on recent efforts and the underlying constraints of meeting the public demand We believe this work provides the basic information for anyone interested in biofortification and stimulate further research to meet this unique challenge **Protein Intake in Health and Disease**

Victor R. Preedy, 2025-07-31 Proteins are fundamental to human health serving as building blocks for cellular structures providing essential energy and supporting tissue function In Protein Intake in Health and Disease the critical biomedical and nutritional roles of protein in the diet are explored in depth Topics include protein quality the impact of both low and high protein diets and the metabolic disorders and diseases linked to protein malnutrition The book delves into protein s influence across the lifespan from maternal health and early development to the nutritional needs of children adolescents and the aging population Each chapter is enriched with practical insights for broader health applications and concise summary points to aid understanding Features Contains a mini dictionary of terms and summary points in each chapter to facilitate clear understanding Highly illustrated with figures and multiple tables in each chapter Chapter contributors represent global coverage This book is written for nutritionists food scientists and health care professionals as well as research scientists and practitioners It is also practically designed for policy makers and libraries *Plant Transcription Factors* Vikas Srivastava, Sonal Mishra, Shakti Mehrotra, Santosh Kumar Upadhyay, 2022-11-09 Plant Transcription Factors Contribution in Development Metabolism and Environmental Stress provides comprehensive coverage of plant TFs and their various

functions evaluating their crucial role in growth and development signaling stress management and other key plant processes Sections cover the significance of plant TFs in functional genomics the influence of phyto hormones on the modulation of plant TFs plant development and metabolism including shoot development flowering development and alkaloid biosynthesis The book s final section reviews the role of TFs in various plant stresses including temperature water and heavy metal stress Written by leading experts around the globe this book is an essential read to researchers interested in plant signaling and plant genomics Presents the latest advances in plant transcription factors and their functions Discusses the influence of phyto hormones on the modulation of plant transcription factors Highlights the relationship between plant TFs and plant development

Advances in Nanotechnology for Smart Agriculture Parul Chaudhary, Anuj Chaudhary, Ashok Kumar Nadda, Priyanka Khatri, 2023-06-15 The yield of major agricultural crops can be severely decreased due to the inappropriate application of commonly used harmful chemicals Excessive agrochemicals in field application can negatively affect microbial populations and their diversity which in turn ultimately affects plant growth Thus it is necessary to turn toward more eco friendly approaches which equally protect crops as well as the desirable microbial populations of complex soil systems Nanoparticles are considered as potential agents for the production and development of sustainable agriculture Green synthesis of nanoparticles has gained attention as a useful measure to diminish the harmful effects associated with the old methods of nanoparticle synthesis *Advances in Nanotechnology for Smart Agriculture Techniques and Applications* illustrates the science and practical applications of nanoparticles for sustainable agriculture Features Examines the role of nanotechnology in agricultural best practices including sustainable development precision farming and long term soil health

Legumes for Global Food Security, volume II , 2023-10-18 Humanity is facing many global challenges These include 1 achieving food security for a rapidly growing population 2 slowing the progression of climate change by reducing the production and release of greenhouse gases as consequence of human activity and 3 meeting the increasing demand for clean energy that will not harm the environment In this regard legumes deliver several important services to societies Legumes provide a diverse range of food crops that are significant sources of plant based proteins for humans globally Grain legumes present outstanding nutritional and nutraceutical properties while being an affordable food that contributes to achieving future global food and feed security in the context of an increasing world population *Plant Signaling Molecules* M. Iqbal R. Khan, Palakolanu Sudhakar Reddy, Antonio Ferrante, Nafees A Khan, 2019-03-15 *Plant Signaling Molecule Role and Regulation under Stressful Environments* explores tolerance mechanisms mediated by signaling molecules in plants for achieving sustainability under changing environmental conditions Including a wide range of potential molecules from primary to secondary metabolites the book presents the status and future prospects of the role and regulation of signaling molecules at physiological biochemical molecular and structural level under abiotic stress tolerance This book is designed to enhance the mechanistic understanding of signaling molecules and will be an important resource for plant biologists in

developing stress tolerant crops to achieve sustainability under changing environmental conditions Focuses on plant biology under stress conditions Provides a compendium of knowledge related to plant adaptation physiology biochemistry and molecular responses Identifies treatments that enhance plant tolerance to abiotic stresses Illustrates specific physiological pathways that are considered key points for plant adaptation or tolerance to abiotic stresses *Plant Biotic Interactions* Ajit Varma, Swati Tripathi, Ram Prasad, 2019-11-28 This book highlights recent advances in the field of plant biotic interactions and explores current serious issues in the crop production industry It is intended to attract more attention to these important but often overlooked areas and to stimulate new ideas for future research Plants are constantly under attack by pathogens pests and parasites which can significantly impact worldwide food production and human health While pathogens and pests attack and interconnect with their hosts in a variety of ways plants have developed sophisticated immune systems to fight infections In the field of plant biotic interactions most of the studies to date have focused on the function and signaling pathways of plant disease resistance proteins and pattern recognition receptors as well as pathogen effector proteins In contrast this book presents new and emerging research areas and introduces students researchers academics and policy advisors to the latest trends in e g microbial technology environmental microbiology agricultural science the health sciences biological sciences and other related disciplines **Improving Abiotic Stress Tolerance in Plants** M. Iqbal R.

Khan, Amarjeet Singh, Péter Poór, 2020-05-13 Abiotic stresses such as drought flooding high or low temperatures metal toxicity and salinity can hamper plant growth and development *Improving Abiotic Stress Tolerance in Plants* explains the physiological and molecular mechanisms plants naturally exhibit to withstand abiotic stresses and outlines the potential approaches to enhance plant abiotic stress tolerance to extreme conditions Synthesising developments in plant stress biology the book offers strategies that can be used in breeding genomic molecular physiological and biotechnological approaches that hold the potential to develop resilient plants and improve crop productivity worldwide Features Comprehensively explains molecular and physiological mechanism of multiple abiotic stress tolerance in plants Discusses recent advancements in crop abiotic stress tolerance mechanism and highlights strategies to develop abiotic stress tolerant genotypes for sustainability Stimulates synthesis of information for plant stress biology for biotechnological applications Presents essential information for large scale breeding and agricultural biotechnological programs for crop improvement Written by a team of expert scientists this book benefits researchers in the field of plant stress biology and is essential reading for graduate students and researchers generating stress tolerant crops through genetic engineering and plant breeding It appeals to individuals developing sustainable agriculture through physiological and biotechnological applications Prospects for Traditional and Non-conventional Energy Sources in Developing Countries David Hughart, 1979 **Participatory Learning of Sustainable Agricultural Practices Between Extension Agents and Farmers** Natalie Bement Rector, 1993
