

**Ian Hutchby: *Conversation and Technology. From the Telephone to the Internet*, Cambridge: Polity, 2001, 221 sider.**

Medierne er fulde af menneskers konversation, og samtaler udgør ikke blot indholdet i stadig flere mediegenrer fra radioens »phone-ins« over tv's »talkshows« til Internettets »chat«, men er også et centralt element i forståelsen af mediernes kulturelle karakter. Medieforskeren Paddy Scannell har således peget på, hvorledes radio og tv's »kommunikative etos« på afgørende vis er præget af konversationsens høflighedskodeks, hvilket bidrager til disse mediers moderne og demokratiske natur (se *MedieKultur* nr. 22), og diskursteoretikeren Norman Fairclough taler om konversationsliggørelsen af den offentlige (medie)kommunikation som et helt centralt kendetegn ved offentlighedens forandring. Samtalen – og ikke mindst den selskabelige samtale mellem almindelige mennesker – har i forlængelse af disse og mange andre studier fået opskrevet sin normative demokratiske værdi i en sådan grad, at den amerikanske medieforsker Michael Schudson har følt sig nødsaget til at tale med store bogstaver og proklamere, at »samtalen ikke er demokratiets sjæl« (se *MedieKultur* nr. 33).

Trods den megen fokus på samtale, har den sproganalytiske disciplin, der har samtale som sit speciale, konversationsanalysen, paradoksalt nok været noget fraværende i denne analytiske beskæftigelse. Social interaktionisme, diskursanalyse, kvalitativ interviewanalyse m.m. har været trukket ind som hjælpedisciplin i analysen af mediesamtaler, men egentlig – hardcore – konversationsanalyse har der været få eksempler på. Med Ian Hutchbys bog *Conversation and Technology* er der blevet rådet noget bod på denne mangel. Hutchby har tidligere skrevet en lærebog i konversationsanalyse (sammen med R. Wooffitt: *Conversation Analysis*, 1998), og en monografi om *Confrontation Talk* i radioprogrammer (1996). Som en af de få inden for denne sprogvidenskabelige disciplin har han specialiseret sig i analyse af mediebaserede samtaler, og hans arbejde bliver ikke mindre interessant af, at han samtidig reflekterer teoretisk over forskelle og ligheder mellem medie- og ansigt-til-ansigt baserede samtaler samt diskuterer teknologiens betydning for forandringer i kommunikationsformerne.

I indledningen til *Conversation and Technology* peger han på, at »vi kan lære mere om den menneskelige kommunikations natur ved at observere, hvordan den påvirkes af teknologi, og

tilsvarende kan vi lære mere om kommunikationsteknologiernes sociale natur ved at reflektere over, hvorledes de både er afhængige af og transformerer basale menneskelige kommunikationsmønstre« (s. 3). Han noterer i den sammenhæng, at konversationsanalysen af praktisk-metodiske årsager ofte har taget afsæt i båndoptagelser af telefonsamtaler, da man her havde at gøre med samtaleforløb, der lod sig analysere uden at tage hensyn til non-verbale sider af kommunikationen. Men i sådanne analyser har man sjældent reflekteret, hvilken forskel medieteknologien gjorde i forhold til en »ren« ansigt-til-ansigt baseret kommunikation. Hans ærinde er ikke at foretage normative kategoriseringer om ansigt-til-ansigts kommunikationens fortrin eller ægthed endsize demokratiske potentialer sammenlignet med medieformidlede samtaler. I stedet er formålet at levere en detaljeret beskrivelse af de forandringer i den observerbare kommunikative adfærd, som medieteknologiernes fører med sig.

Ian Hutchbys forståelse af medieteknologiernes betydning for samtalernes struktur og forløb er inspireret af J. J. Gibsons økologiske perceptionspsykologi og hans begreb om »affordances«, der desværre ikke så let lader sig oversætte til dansk. Ved »affordances« forstås de handlemuligheder, som en given genstand tilbyder forskellige aktører. For nogle dyr vil bladene på en plante tilbyde en skyggefuld plads, for andre vil de udgøre et måltid mad; men bladenes form og substans sætter samtidig nogle begrænsninger på brugen. På samme måde vil en given kommunikationsteknologi invitere til forskellige handlinger, som dens materielle egenskaber muliggør. Disse handlemuligheder kan være forskellige afhængige af den konkrete situation og de specifikke aktører og deres intentioner, og som sådan er en teknologi åben over for brugerens fortolkning og brugsperspektiv. En kommunikationsteknologi udgør imidlertid ikke kun en vifte af muligheder, men tillige et sæt af begrænsninger. Teknologien udgør en materialitet, hvis egenskaber ikke tillader alle former for kommunikativ interaktion med brugeren, men netop afgrænser et sæt af mere eller mindre oplagte brugsformer, ligesom den virker strukturerende ind på kommunikationen. En given teknologisk kommunikative »affordances« er både muligheds-skabende, begrænsende og strukturerende for interaktionen.

Med denne begrebsliggørelse af medieteknologiens betydning forsøger Hutchby at placere sig i en »tredje« position mellem på den ene side et

**Conversation and Technology** Ian Hutchby, 2013-04-24 We live in a world where social interaction is increasingly mediated by technological devices In this book Ian Hutchby explores the impact these technologies have on our attempts to communicate Focusing on four examples telephones computerized expert systems at work speech based systems dealing with enquiries from the public and multi user spaces on the Internet Hutchby asks are we increasingly technologized conversationalists or is technology increasingly conversationalized Conversation and Technology draws on recent theory and empirical research in conversation analysis ethnomethodology and the social construction of technology In novel contributions to each of these areas Hutchby argues that the ways in which we interact can be profoundly shaped by technological media while at the same time we ourselves are shapers of both the cultural and interactional properties of these technologies The book begins by examining a variety of theoretical perspectives on this issue Hutchby offers a critical appraisal of recent sociological thinking which has tended to over estimate society s influence on technological development Instead he calls for a new appreciation of the relationship between human communication and technology Using a range of case studies to illustrate his argument Hutchby explores the multiplicity of ways in which technology affects our ordinary conversational practices Readers in areas as diverse as sociology communication studies psychology computer science and management studies will find much of interest in this account of the human and communicative properties of various forms of modern communication technology
