**Norman J. Ashford, Pierre Coutu, John
R. Beasley**

Boeing 777 Performance Manual:

Manual of Simulation in Healthcare Richard H. Riley, 2016 Practising fundamental patient care skills and techniques is essential to the development of trainees wider competencies in all medical specialties After the success of simulation learning techniques used in other industries such as aviation this approach has been adopted into medical education This book assists novice and experienced teachers in each of these fields to develop a teaching framework that incorporates simulation The Manual of Simulation in Healthcare Second Edition is fully revised and updated New material includes a greater emphasis on patient safety interprofessional education and a more descriptive illustration of simulation in the areas of education acute care medicine and aviation Divided into three sections it ranges from the logistics of establishing a simulation and skills centre and the inherent problems with funding equipment staffing and course development to the considerations for healthcare centred simulation within medical education and the steps required to develop courses that comply with best practice in medical education Providing an in depth understanding of how medical educators can best incorporate simulation teaching methodologies into their curricula this book is an invaluable resource to teachers across all medical specialties

Human Performance on the Flight Deck Don Harris, 2016-12-05 Taking an integrated systems approach to dealing exclusively with the human performance issues encountered on the flight deck of the modern airliner this book describes the inter relationships between the various application areas of human factors recognising that the human contribution to the operation of an airliner does not fall into neat pigeonholes The relationship between areas such as pilot selection training flight deck design and safety management is continually emphasised within the book It also affirms the upside of human factors in aviation the positive contribution that it can make to the industry and avoids placing undue emphasis on when the human component fails The book is divided into four main parts Part one describes the underpinning science base with chapters on human information processing workload situation awareness decision making error and individual differences Part two of the book looks at the human in the system containing chapters on pilot selection simulation and training stress fatigue and alcohol and environmental stressors Part three takes a closer look at the machine the aircraft beginning with an examination of flight deck display design followed by chapters on aircraft control flight deck automation and HCI on the flight deck Part four completes the volume with a consideration of safety management issues both on the flight deck and across the airline the final chapter in this section looks at human factors for incident and accident investigation The book is written for professionals within the aviation industry both on the flight deck and elsewhere for post graduate students and for researchers working in the area
