- ▶ 8/16 Channel 4CIF real-time digital recording
- ▶ Flexible high-resolution HDMI and VGA monitor outputs
- ▶ Hybrid camera viewing and recording
- ▶ Remote viewing, playback, control, and configuration
- ▶ Mobile Device support for viewing

The Bosch Video Recorder 670 Series is an 8/16 channel digital recorder that uses the latest H.264 compression technology. With the supplied PC software and built-in web server, the 670 Series is a fully integrated, stand-alone video management solution that's ready to go, straight out of the box. Available with a variety of storage capacities, the 670 Series features a highly reliable embedded design that minimizes maintenance and reduces operational costs. The recorder is also available with a built-in DVD writer.

System overview

The 670 Series takes advantage of H.264 video compression technology to dramatically reduce the amount of storage and bandwidth needed while still producing a better image quality. The 670 Series records multiple video and audio signals while simultaneously providing live multi-screen viewing and playback. Comprehensive search and playback functions provide quick recall and viewing of recorded video.

Hybrid

Hybrid camera viewing and recording is possible for integrated IP cameras (SD stream) on a local DVR and monitor. The maximum 16 channels can be optimally divided for up to 4 IP cameras and the balance as

analog cameras. The IP cameras are configured via the camera web client. The following functions are not supported:

- Event triggered recording (motion and/or input)
- Viewing on local Mon.B
- Audio

Recording

Ease of use is a key feature of the 670 Series design. Simply connect the cameras, apply power, and the unit begins recording automatically. All recording takes place in the background with no operator intervention required.

The use of H.264 compression reduces the file size of recordings by as much as 30% compared to standard MPEG-4, without sacrificing image quality. The 670 Series can record at up to 25 (PAL) / 30 (NTSC) images per second, per channel at 4CIF resolution. If required, alarm recordings (input and motion) and continuous recordings can be split over two partitions. An overwrite mode can then be selected separately for each partition.

Dome Control

The 670 Series can control pan/tilt/zoom (PTZ) equipment via RS-485/ RS-232 serial communications. PTZ devices, including the Bosch AutoDome and a number of third party domes, are supported.
