## AutoDome® 200 Series PTZ Camera System

Bosch's AutoDome modular camera system is a revolutionary new concept in dome cameras. More than just a series of cameras, it's a dome platform built around a system of intelligent, interchangeable modules that allow you to update camera functionality quickly and cost-effectively. Using common components lets you install a basic camera system today and migrate to a more advanced version tomorrow – without having to replace the entire dome, thus protecting your initial investment.

### Interchangeable modules

The entire AutoDome system is based on five interchangeable modules: the CPU, camera, housing, communications, and power supply. Simply swap one of AutoDome's interchangeable modules and quickly upgrade from analog to IP, color to day/night, or add motion tracking. Never before have you had the ability to adapt a security system to your changing needs this quickly or inexpensively.

By using the same housing components, all installations have a consistent look, and observers have no idea which type of camera, (if any) is watching over them. This unique, modular design also gives you the flexibility to move cameras between different housings when special coverage is needed, or as site plan requirements change. For example, an 18x PTZ camera over a specific area could easily be "hot-swapped" to a 26x day/night without removing the power.

- » Economical, high-speed PTZ dome
- » Fully interchangeable CPUs, cameras, housings, communications, and mounts
- » 18x color camera
- » Optional hybrid operation provides simultaneous analog (coax) and IP (MPEG-4) connectivity
- » UTP transmission standard on all analog models
- » All versions allow for remote configuration and update
- » Multi-protocol capable
- » Advanced diagnostics
- » Three-year warranty

Migrating from a basic dome to one with advanced features such as AutoTrack II intelligent tracking can be done quickly and easily, without requiring dome removal or rewiring. AutoDome's Ethernet communications module allows you to add IP functionality while maintaining connectivity to existing analog inputs and outputs.

### 200 Series highlights

The AutoDome 200 Series is an economical, high-speed dome camera that uses a high-performance, 18x color PTZ camera. The 200 Series supports a variety of standard and optional video and data transmission methods, including BNC (over coax and UTP), fiber, and even TCP/IP over Ethernet. Remote control, configuration, and firmware updates can also be performed over these cables, offering you unparalleled control of your cameras.

The optional IP Communications Module has hybrid functionality to protect your current analog technology investment while providing a clear and stable migration path to fully digital, IP-based solutions. This allows you to move to IP video at your own pace – all at once or one camera at a time. And since all AutoDome modules are completely interchangeable, there is no need to replace expensive components (for example cameras) or labor-intensive components (for example mounts and housings).
