Excerpt from A Laboratory Manual in Practical Botany Tm course of botanical study here outlined is intended to give the student a general view of the subject and at the same time to lay a foundation upon which more advanced studies may be built The outline of classification is to serve as a chart in the practical work in the laboratory The book is a laboratory manual The student's first work should be with the practical studies and these are not necessarily to be taken up in the order in which they occur in the classification To the writer it seems a good plan to use so much of the classification morphology and physiology as are given in these pages as the starting point to ask the student to read as many of the references given in connection with the various subjects as time permits and to require him to embody the results of his reading and practical work in well considered essays So pursued the study of botany provides the means of developing habits of close and accurate observation of cultivating the reasoning powers and of teaching the pupil to use clear and correct English that can scarcely be claimed for any other subject pursued in the schools About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Santos,1939 **Practical Manual for Botany** Elizabeth Margaret,2008 **TTH 711 Horticultural Botany** ,1984* Laboratory Manual for Applied Botany Karen McMahon,Estelle Levetin,Rob Reinsvold,2001-07-16 Science education is experiencing a revitalization as it is recognized that science should be accessible to everyone not just society's future scientists One way to make the study of science more substantive to the non major is to require a laboratory component for all science courses The subject of applied botany with its emphasis on the practical aspects of plant science the authors believe will be appealing to the non major as it exemplifies how a basic science can be applied to problem solving Laboratory Manual for Applied Botany will

make students realize that the study of plants is relevant to their lives and that they can participate in the discovery process of science Although the manual includes much of the basic plant anatomy found in standard botany manuals it differs in taking a practical approach examining those plants and plant products that have sustained or affected human society
