Schneider,2023-08-03 The characteristic Planck energy scale of quantum gravity makes experimental access to the relevant physics apparently impossible Nevertheless low energy experiments linking gravity and the quantum have been undertaken the Page and Geilker quantum Cavendish experiment and the Colella Overhauser Werner neutron interferometry experiment for instance However neither probes states in which gravity remains in a coherent quantum superposition unlike it is claimed recent proposals In essence if two initially unentangled subsystems interacting solely via gravity become entangled then theorems of quantum mechanics show that gravity cannot be a classical subsystem There are formidable challenges to such an experiment but remarkably tabletop technology into the gravity of very small bodies has advanced to the point that such an experiment might be feasible in the near future This Element explains the proposal and what it aims to show highlighting the important ways in which its interpretation is theory laden **Computational Science and Engineering** Arpan
