Principles of Economics (UUM Press) Anizah Md Ali, 2021-11-14 This book is organized to make it easier for students to understand its contents which is based on nearly 20 years of teaching experience in economics. Environmental Economics explores the ways in which economic theory and its applications as practised and taught today must be modified to explicitly accommodate the goal of sustainability and the vital role played by environmental capital. Pivoting around the first and second laws of thermodynamics as well as the principles of ecological resilience, this book is divided into five key parts which includes extensive coverage of environmental microeconomics and macroeconomics. It drills down into issues and challenges including consumer demand, production and supply, market organisation, renewable and non-renewable resources, environmental valuation, macroeconomic stabilisation and international trade and globalisation. Drawing on case studies from forestry, water, soil, air quality and mining, this book will equip readers with skills that enable the analyses of environmental and economic policy issues with a specific focus on the sustainability of the economy. Rich in pedagogical features including key concepts boxes and review questions at the end of each chapter, this book will be a vital resource for upper-level undergraduate and postgraduate students studying not only environmental economics, ecological economics but also economics in general. **Teaching Principles of Microeconomics** Mark Maier, Phil Ruder, 2023-01-06
