Corpus Stylistics in Heart of Darkness and its Italian Translations Lorenzo Mastropierro, 2017-11-16 This book explores the interaction between corpus stylistics and translation studies. It shows how corpus methods can be used to compare literary texts to their translations through the analysis of Joseph Conrad's *Heart of Darkness* and four of its Italian translations. The comparison focuses on stylistic features related to the major themes of *Heart of Darkness*. By combining quantitative and qualitative techniques, Mastropierro discusses how alterations to the original's stylistic features can affect the interpretation of the themes in translation. The discussion illuminates the manipulative effects that translating can have on the reception of a text, showing how textual alterations can trigger different readings. This book advances the multidisciplinary dialogue between corpus linguistics and translation studies and is a valuable resource for students and researchers interested in the application of corpus approaches to stylistics and translation.

Stylistic Approaches to Pop Culture Christoph Schubert, Valentin Werner, 2022-08-17 This collection showcases the unique potential of stylistic approaches for better understanding the multifaceted nature of pop culture discourse. As its point of departure, the book takes the notion of pop culture as a phenomenon characterized by the interaction of linguistic signs with other modes such as imagery and music to examine a diverse range of genres through the lens of stylistics. Each section is grouped around thematic lines, looking at literary fiction, telecinematic discourse, music and lyrics, as well as cartoons and video games. The 12 chapters analyze different forms of media through five central strands of stylistics: from sociolinguistic/pragmatic/cognitive/multimodal to corpus-based approaches. In drawing on these various stylistic frameworks and applying them across genres and modes, the contributions offer readers deeper insights into the role of scripted and performed language in social representation and identity construction, thereby highlighting the affordances of stylistics research in studying pop cultural texts. This volume is of particular interest to students and researchers in stylistics, linguistics, literary studies, media studies, and cultural studies.

The Bloomsbury Companion to Stylistics Violeta Sotirova, 2015-11-19 This Bloomsbury Companion provides an overview of stylistics with a detailed outline of the scope and history of the discipline, as well as its key areas of research. The main research methods and approaches within the field are presented with a detailed overview and then illustrated with a chapter of unique new research by a leading scholar in the field. The Companion also features in-depth explorations of current research areas in stylistics in the form of new studies by established researchers in the field. The broad interdisciplinary scope of stylistics is reflected in the wide array of approaches taken to the linguistic study of texts, drawing on traditions from linguistics, literary theory, literary criticism, critical theory, and narratology, and in the diverse group of internationally recognised contributors.

Language, Corpora, and Technology in Applied Linguistics Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society have become more digitalized, especially when computer science and digital technologies have entered a new era in the twenty-first century, translation

studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist. It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies. On the one hand, technologies like NLP, topic modeling, network analysis, and data visualization make distant reading become possible, thus allowing us to have a paradigmatic view of how human ideas, beliefs, values, knowledge, and even emotions have spread in some patterns across cultural, geographical, and language divides in world history. On the other hand, corpus methods such as the use of keywords, collocates, and concordance lines changed the way by which texts were closely read from linear to vertical. With microscope-like corpus tools, we could go deeper into the texture for perception of nuanced meaning. While considering a fact that translation is seldom mono-modal in conveying meaning, we have to reconceptualize context as a multimodal environment where audio-visual and other resources interact to convey and make meaning. With regard to the fast development of digital technology, translation studies take an active role in gaining an enhanced capability in promoting transformation. Complexity has been favored in terms of theoretical framework and methodology. New questions are asked, old ones revisited with novel tools, but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods. We could ask if digital technologies would bring new innovation to study of translation history, a heavily walled land for traditional humanists who tend to repeat so what, to question the less significance of data-driven studies. The idea of high-quality machine translation has become so realistic in today's market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms. Machine translation-assisted communication could help remove boundaries for better communication, but at the same time it also creates conflicts and leads to confrontation. Thus understood, it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies. This Research Topic is intended to promote current directions and new developments in cross-disciplinary critical discourse research. We welcome papers which from a critical analytical perspective deal with contemporary social, scientific, political, economic, or professional discourses and genres. Papers addressing the highlighted topics are especially welcome. In giving weight to these topics, we wish to call to attention some of the most pressing problems currently facing the world.
