science in the history of the West      **Building Culture** Richard F. Teichgraeber, 2010 An inclusive view of the formation of modern American culture An unprecedented wave of interest in building new cultural institutions swept through America from the end of the Civil War through the first decade of the twentieth century Traditionally historians have told us that this sea change was the work of various elites intent on controlling the turmoil and divisions that accompanied the industrialization of the American economy In *Building Culture* Richard Teichgraeber rejects this hierarchical account to pursue one that highlights the multiplicity of attitudes and interests that were on display in America's first great effort to build national cultural institutions Teichgraeber also lays the groundwork of a new interpretive framework for understanding this multisided effort Most native born American champions of culture he contends viewed it as an authentically individualistic ideal For them the concept continued to carry its antebellum meaning of self culture that is individual self development or self improvement and thus was quite resistant to closure around any single fixed definition of what being cultivated might mean They also recognized that in America culture had to connect with the choices of ordinary men and women and therefore had to be fashioned to serve the uses of a democratic rather than an aristocratic society To show how and why this inclusive view of culture was accompanied by a prodigious expansion of American cultural institutions Teichgraeber also explores two of the central but still inadequately mapped developments in the intellectual and cultural history of the industrial era the multifaceted and ultimately successful effort to secure Ralph Waldo Emerson a central place in American culture at large and the growth and consolidation of the American university system certainly the most important of the new cultural institutions built during the industrial era Elegantly written and featuring twenty two illustrations *Building Culture* expands our knowledge of the formation of modern American culture and opens new paths of inquiry into contemporary cultural and intellectual concerns      The Nation ,1915      **Great Books of the Western World: The great ideas** ,1952      **The great ideas** Robert Maynard Hutchins, 1952 A massive set of classic books includes the most influential works of literature philosophy and science in the history of the West      House & Garden ,1926      *The Building News and Engineering Journal* ,1884
