## **Climate Change Ethics And Human Security:**

**Climate Change, Ethics and Human Security** Karen O'Brien, Asunción Lera St. Clair, Berit Kristoffersen, 2010-07-22  
Presenting human security perspectives on climate change this volume raises issues of equity ethics and environmental justice as well as our capacity to respond to what is increasingly considered to be the greatest societal challenge for humankind Written by international experts it argues that climate change must be viewed as an issue of human security and not an environmental problem that can be managed in isolation from larger questions concerning development trajectories and ethical obligations towards the poor and to future generations The concept of human security offers a new approach to the challenges of climate change and the responses that could lead to a more equitable and sustainable future Climate Change Ethics and Human Security will be of interest to researchers policy makers and practitioners concerned with the human dimensions of climate change as well as to upper level students in the social sciences and humanities interested in climate change

*Climate Change, Ethics and Human Security* Karen O'Brien, 2010 Approaches climate change as an issue of human security and ethical obligation arguing for a more equitable and sustainable future

*A Changing Environment for Human Security* Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice

**Sustainability, Capabilities and Human Security** Andrew Crabtree, 2020-02-28 Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy yet sustainability issues have largely remained outside their domain despite sustainability's significance and complex relation to their central value of freedom This volume explores sustainability from a capabilities perspective with the motif of human security inviting a lively discussion within the human development family After introducing the two approaches authors conceptualize relationships between capabilities and the environment examine the scientific and normative validity of environmental indicators and analyse intergenerational justice Climate change is used to exemplify that a human security approach can add

an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism That ontology recognizes shared life experiences problems and life challenges a community of fate The volume ends with a discussion of how the approaches can inform and sometimes critique the Sustainable Development Goals

**Handbook on Climate Change and Human Security** Michael R Redclift, Marco Grasso, 2013-10-31 The Handbook is international in scope and provides an assessment that will be of value to academics students and policy professionals alike NGOs and policy institutes which need a grasp of the specificity and range of the issues and problems will all

*Global Pandemic and Human Security* Rajib Shaw, Anjula Gurtoo, 2022-03-01 This book highlights how the human security aspect has been affected by the global pandemic based on the specific case study field data and evidence COVID 19 has exemplified that the pandemic is global but its responses are local The responses depend on national governance and policy framework use of technology and innovation and people's perceptions and behavior among many others There are many differences in how the pandemic has affected the rich and the poor urban and rural sectors development and fiscal sectors and developed and developing nations and communities Echoing human security principles the 2030 Agenda emphasized a world free of poverty hunger disease and want free of fear and violence with equitable and universal access to quality education health care and social protection to safe drinking water and sanitation where food is sufficient safe affordable and nutritious where habitats are safe resilient and sustainable and where there is universal access to affordable reliable and sustainable energy These basic human security PA1 principles and development agenda are highly affected by the global pandemic worldwide irrespective of its development and economic status Thus the book highlights the nexus between human security and development issues It has two major pillars one is the development and the other is technology issues These two inter dependent topics are discussed in the perspective of the global pandemic making this the most important feature of this book While the world is still in the middle of a pandemic and possibly other natural and biological hazards may affect people's lives and livelihoods in the future this book provides some key learning which can be used to cope with future uncertainties including climate risks Thus the book is timely and relevant to wider readers

**Routledge Handbook of Human Security** Mary Martin, Taylor Owen, 2013-11-07 This Handbook will serve as a standard reference guide to the subject of human security which has grown greatly in importance over the past twenty years Human security has been part of academic and policy discourses since it was first promoted by the UNDP in its 1994 Human Development Report Filling a clear gap in the current literature this volume brings together some of the key scholars and policy makers who have contributed to its emergence as a mainstream concept including Nobel prize winner Amartya Sen and Sadako Ogata who jointly chaired the 2001 Commission on Human Security Drawing upon a range of theoretical and empirical analyses the Handbook provides examples of the use of human security in policies as diverse as disaster management arms control and counter terrorism and in different geographic and institutional settings from Asia to Africa and the UN It also raises important questions about how the concept might be

adapted and operationalised in future Over the course of the book the authors draw on three key aspects of human security thinking Theoretical issues to do with defining human security as a specific discourse Human security from a policy and institutional perspective and how it is operationalised in different policy and geographic contexts Case studies and empirical work Featuring some of the leading scholars in the field the Routledge Handbook of Human Security will be essential reading for all students of human security critical security conflict and development peace and conflict studies and of great interest to students of international security and IR in general **A Changing Environment for Human Security** Linda

Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice Justice, Sustainability, and Security E. Heinze, 2013-07-17 Justice Sustainability and Security not only enhances our knowledge of these issues but it teases out our moral dimensions and offer prescriptions for how governments and global actors might craft their policies to better consider their effects on the global human condition

*Ecological Security* Matt McDonald, 2021-09-23 Climate change is increasingly recognised as a security issue Yet this recognition belies contestation over what security means and whose security is viewed as threatened Different accounts here defined as discourses of security range from those focused on national sovereignty to those emphasising the vulnerability of human populations This book examines the ethical assumptions and implications of these climate security discourses ultimately making a case for moving beyond the protection of human institutions and collectives Drawing on insights from political ecology feminism and critical theory Matt McDonald suggests the need to focus on the resilience of ecosystems themselves when approaching the climate security relationship orienting towards the most vulnerable across time space and species The book outlines the ethical assumptions and contours of ecological security before exploring how it might find purchase in contemporary political contexts A shift in this direction could not be more urgent given the current climate crisis

**Climate Change, Migration, and Human Security in Southeast Asia** Lorraine M. Elliott, 2012 **Safeguarding**

**Human Progress** Khalid Malik, 2014 This publication notes that the most effective policies for supporting human development and reducing vulnerabilities are those that incorporate principles of universalism by placing people at the centre of policy Responding to life cycle and structural vulnerabilities through social investments and policy interventions deliver long term benefits by reducing vulnerabilities at critical life phases and mitigating structural disadvantage faced by discriminated groups in society Yet the emerging challenges and risks posed by vulnerability given the backdrop of globalisation require a concerted approach and collective action that will measure up to the scale of these shared challenges In building this argument this companion volume to the 2014 Human Development Report draws on research commissioned from eminent economists demographers and social scientists

*Global Environmental Change and Human Security* Richard A. Matthew, Jon Barnett, Bryan McDonald, Karen L. O'Brien, 2009-10-09 Experts discuss the risks global environmental change poses for the human security including disaster and disease violence and increasing inequity In recent years scholars in international relations and other fields have begun to conceive of security more broadly moving away from a state centered concept of national security toward the idea of human security which emphasizes the individual and human well being Viewing global environmental change through the lens of human security connects such problems as melting ice caps and carbon emissions to poverty vulnerability equity and conflict This book examines the complex social health and economic consequences of environmental change across the globe In chapters that are both academically rigorous and policy relevant the book discusses the connections of global environmental change to urban poverty natural disasters with a case study of Hurricane Katrina violent conflict with a study of the decade long Nepalese civil war population gender and development The book makes clear the inadequacy of traditional understandings of security and shows how global environmental change is raising new unavoidable questions of human insecurity conflict cooperation and sustainable development Contributors W Neil Adger Jennifer Bailey Jon Barnett Victoria Basolo Hans Georg Bohle Mike Brklacich May Chazan Chris Cocklin Geoffrey D Dabelko Indra de Soysa Heather Goldsworthy Betsy Hartmann Robin M Leichenko Laura Little Alexander Lopez Richard A Matthew Bryan McDonald Eric Neumayer Kwasi Nsiah Gyabaah Karen L O'Brien Marvin S Soroos Bishnu Raj Upreti

*Environment and Human Security* Purusottam Bhattacharya, Sugata Hazra, 2003 Contributed papers presented earlier at a seminar

*Climate Change and Arctic Security* Lassi Heininen, Heather Exner-Pirot, 2019-07-30 This book assesses the construction of security in the context of climate change with a focus on the Arctic region It examines and discusses changes in the security premises of the Arctic states from traditional security to environmental and human security In particular the book explores how climate change impacts security discourses and premises as well as theoretically discussing the possibility for another change from circumpolar stability into peaceful change Chapters cover topics such as the ethics of climate change in the arctic China's emerging power and influence on arctic climate security the discursive transformation of the definition of security and the intersection between urban climate and Arctic studies The book concludes with the question of

whether a paradigm shift in our understanding of traditional security is possible and whether it is already occurring in the Arctic     *Environmental Ethics in Managing Resources in the Asia Pacific* Ravichandran Moorthy, Darryl Raymund Johnson Macer, 2013     **Globalization and Security** G. Honor Fagan, 2009 Broad in scope this two volume set covers the economic and political aspects of globalization as well as its social and cultural impacts     **UNU Strategic Plan 2002** United Nations University, 2002     *The Human Right to Peace* Douglas Roche, 2003 The peoples of the Earth have a sacred right to peace This is the conviction and the theme of this new book by Douglas Roche who builds upon a long career in politics diplomacy and social activism in examining the requirements for peace in the post September 11th world     **Canned Heat** Marcello Di Paola, Gianfranco Pellegrino, 2014-10-03 Climate change is a key challenge in the contemporary world This volume studies climate change through many lenses politics law ethics philosophy religion and contemporary art and culture The essays explore alternatives for sustainable development and highlight oft overlooked issues such as climate change refugees and food justice Designed as four parts the volume first offers an astute diagnosis of the political and moral intricacies of climate change second deals specifically with topics in the political theory of climate change governance third focuses on the moral theory of climate change and finally analyzes the specific ramifications of the climate change problem With contributions from experts across the world this will be especially useful to scholars and students of climate change studies development studies environmental studies politics and ethics and philosophy It will also interest policy makers social activists governmental and non governmental agencies and those in media and journalism
