Shaw, 1991-02-21 This book provides an integrated thorough and up to date review of the nature and development of the Kalahari environment an environment of great ecological and geomorphological diversity Its complex climatic and geological history and its long association with human societies attempting to utilise its natural resources are aspects of increasing scientific interest The book has evolved from the authors own research in the Kalahari and attempts to provide explanations and answers to some of the many questions raised about this region ranging from the commonly asked is it really a desert to more specific and detailed concerns The interdisciplinary approach will make the book of interest to researchers lecturers and advanced students in earth sciences environmental studies tropical geomorphology and Quaternary science The extensive bibliography will also make the book a very important source of reference **Books in Series**, 1985 Vols for 1980 issued in three parts Series Authors and Titles **Periglacial and Paraglacial Processes and Environments** Jasper Knight, Stephan Harrison, 2009 Periglacial and paraglacial environments located outside ice sheet margins but responding to similar climate forcings are key to identifying climate change effects upon the Earth system These environments are relicts of cold Earth processes and so are most sensitive to global warming Changes in the distribution and thickness of permafrost in continental interiors have implications for ecosystem and landscape stability Periglacial Alpine environments are experiencing increased rockfall and mass movement leading to rock glacier instability and sediment release to downstream rivers In turn these landscape effects impact on natural hazards and human activities in these sensitive and geologically transient environments **Geographers** Patrick H. Armstrong, Geoffrey Martin, 2015-12-14 An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought Subjects are drawn from all periods and from all parts of the world and include famous names as well

as those less well known explorers independent thinkers and scholars Each paper describes the geographer s education life and work and discusses their influence and spread of academic ideas Each study includes a select bibliography and brief chronology The work includes a general index and a cumulative index of geographers listed in volumes published to date

The Geomorphology of the Great Barrier Reef David Hopley, 1982 New York Wiley c1982 *Ice Ages and the Thermal Equilibrium of the Earth* David P. Adam, 1969 *Climate Controls on Stratigraphy* C. B. Cecil, N. Terence Edgar, 2003 The role of climate as a primary control on stratigraphy is the cornerstone of this volume The emphasis on climate is in distinct contrast to most previous studies in which stratigraphic variability has been related to changes in sea level and in tectonic activity Furthermore the findings derived from several years of detailed study of modern and ancient key geologic sections around the world indicate that traditional depositional models generally do not fully explain the origin of fossil fuels Although the results of the studies presented in this volume are intended to contribute to the disciplines of sedimentary geology and stratigraphy the contributors recognize that their results may also contribute to a better understanding of global climate change The theoretical background of climate control on sediment supply and stratigraphy is presented in the volume With this background in place detailed documentation and analysis of climate control on the lithologic variation of a single Middle Pennsylvanian **Subject Guide to Books in Print** , 1983 *Mountain Geography* Martin F. Price, 2013-08-24 Mountain Geography is a comprehensive resource that gives readers an in depth understanding of the geographical processes that occur in the world s mountains and the impact of these regions on culture and society The volume begins with an introduction that defines mountains followed by a comprehensive treatment of their physical geography including origins climatology snow and ice landforms and geomorphic processes soils vegetation and wildlife The concluding chapters discuss the human geography of mountains and our attitudes toward them populations in the mountain regions and their livelihoods and interactions within dynamic environments the diversity of mountain agriculture and the challenges of sustainable mountain development Book Jacket **Library of Congress Catalog** Library of Congress, 1970 Library of Congress Catalogs Library of Congress, 1976
