Clifford D. Packer, Gabrielle N. Berger, Somnath Mookherjee, 2016-11-02 This book provides medical students and physicians with a practical step by step guide on how to write and publish a medical case report The case report is the traditional way for physicians to describe their unique or unusual cases to a broad audience and it plays an important role in the discovery of new diseases or syndromes unusual manifestations of disease important adverse drug reactions and the generation of hypotheses for further study This book guides readers through the process from choosing a case to report on to finding a publisher and then comment on future directions and potential new uses of case reports including expanded computer case databases to optimize care for individual patients and new applications in medical education Interspersed throughout the text are example case reports many written by the authors with commentary on their experiences working with those reports to provide context and aid readers in creating clear concise and useful case reports      **Knowing and Acting in Medicine**

Robyn Bluhm, 2016-12-13 What roles do different kinds of knowledge play in medicine What roles should they play What standards epistemic ethical practical should be met before knowledge is used to develop policy or practice Medical decision making whether in the clinic or at the policy level can have serious and far reaching consequences It is therefore important to base decisions on the best available knowledge Yet deciding what should count as the best available knowledge is not easy This important book addresses philosophical questions about what kinds of knowledge should be taken into account and how knowledge should inform practice and policy The chapters in this volume examine the relationship between knowledge and action in medical research practice and policy Knowledge is broadly construed to include knowledge from clinical laboratory or social science research and from the clinical encounter as well as broader background assumptions prevalent in society that inform both the kinds of knowledge that are taken to be relevant to medicine and how that knowledge is interpreted in decision making Such knowledge may be relevant not only to clinical decision making with regard to the care of individual

patients but also to the practice of scientific research the development of policy and practice guidelines and decisions made by patients or by patient advocacy groups *CLINICAL CASE REPORTING IN EVIDENCE-BASED MEDICINE* Milos

Jenicek,1999 There is some truth in the saying that any patient is a potential case report it is important however to know which patient to choose and how to prepare the report to best effect Until now the place of clinical case reports in the evidence based medicine movement has been uncertain but in this book the author shows the reader how to choose relevant clinical cases worthy of reporting how to report these cases in a clear structured manner how to prepare clinical case series reports how to prepare reports that meet the requirements of medical journals how to prepare reports that make valuable contributions to the chain of evidence in evidence based medicine Good clinical reports and case series must link together several elements of clinical epidemiology clinimetrics qualitative research principles and methods for gathering information on individual clinical situations These foundations are explained here in theory and then applied to an annotated practical example A glossary and bibliography are also included The result is a significant addition to the literature on evidence based medicine **Principles of Research Design and Drug Literature Evaluation, Second Edition** Rajender R.
