Lincoln Library of Essential Information, 1924 **The Works: Claude Monet** Sally Grant, 2026-09 **Monet** Tasha  
Stamford, 2021-02-25 Monet is familiar to millions of people the world over His works are much loved and admired so it's  
almost inconceivable to imagine that at the time he produced his first works Monet enraged critics and the public alike At  
times the light Monet achieved in his paintings was almost the subject itself The light enhanced the works and gave Monet's  
paintings a photographic quality despite the impression of the subject of the piece It was these impressions rather than the  
subjects or themes that established Monet as a revolutionary artist Monet was the founder of the Impressionist movement  
and worked across more than six decades to the point of obsession to produce one of the largest volumes of oeuvres the  
world had ever seen The Impressionists were keen to eliminate the color black from their palettes and encouraged this  
practice at every opportunity It brought about a new color theory which emphasized the presence of color within shadows  
and they worked to the rule that there was no black in nature and therefore it should not be included in their paintings  
Monet is widely regarded as the forerunner of French Impressionism Monet was keen for a move away from realism and the  
traditional oil painting techniques of the 19th century It was early in his career that Monet created a style that focused on  
the light in shadows This study of natural light was the focus of his first Impressionist painting *Impression Sunrise* 1872

which came to represent the new art movement taking shape Louis Leroy a critic who viewed the painting was unsympathetic to the developments taking place in art toward the end of the 19th century and called the work an impression It was meant to ridicule Monet s work and the work of his peers in general however it led to the naming of one of the most exciting movements and phases in art history Impressionism
