The Practice of Chemistry Donald J. Wink, Sharon Fetzner-Gislason, Sheila McNicholas, 2003-03 Students can't do chemistry if they can't do the math. The Practice of Chemistry First Edition is the only preparatory chemistry text to offer students targeted consistent mathematical support to make sure they understand how to use math especially algebra in chemical problem solving. The book's unique focus on actual chemical practice, extensive study tools, and integrated media makes The Practice of Chemistry the most effective way to prepare students for the standard general chemistry course and bright futures as science majors. This special PowerPoint tour of the text was created by Don Wink. http://www.bfwpub.com/pdfs/wink/POCPowerPoint_Final.ppt 832KB

The Success Criteria Playbook John Almarode, Douglas Fisher, Kateri Thunder, Nancy Frey, 2021-01-08 Provide students a clear view of what success looks like for any process, task, or product. What does success look like for your students? How will they know if they have learned? This essential component of teaching and learning can be difficult to articulate but is vital to achievement for both teachers and students. The Success Criteria Playbook catapults teachers beyond learning intentions to define clearly what success looks like for every student, whether face-to-face or in a remote learning environment. Designed to be used collaboratively in grade-level subject area teams or even on your own, the step-by-step playbook expands teacher understanding of how success criteria can be utilized to maximize student learning and better engage learners in monitoring and evaluating their own progress. Each module is designed to support the creation and immediate implementation of high

quality high impact success criteria and includes Templates that allow for guided and independent study for teachers

Extensive STEM focused examples from across the K 12 STEM curriculum to guide teacher learning and practice Examples of success criteria applied across learning domains and grades including high school content skills practices dispositions and understandings Ensure equity of access to learning and opportunity for all students by designing and employing high quality high impact success criteria that connect learners to a shared understanding of what success looks like for any given learning intention

How Children Learn Math Nancy Krasa, Karen Tzanetopoulos, Colleen Maas, 2022-10-25 Written for pre service and in service educators as well as parents of children in preschool through grade five this book connects research in cognitive development and math education to offer an accessibly written and practical introduction to the science of elementary math learning Structured according to children s mathematical development How Children Learn Math systematically reviews and synthesizes the latest developmental research on mathematical cognition into accessible sections that explain both the scientific evidence available and its practical classroom application Written by an author team with decades of collective experience in cognitive learning research clinical learning evaluations and classroom experience working with both teachers and children this amply illustrated text offers a powerful resource for understanding children s mathematical development from quantitative intuition to word problems and helps readers understand and identify math learning difficulties that may emerge in later grades Aimed at pre service and in service teachers and educators with little background in cognitive development the book distills important findings in cognitive development into clear accessible language and practical suggestions The book therefore serves as an ideal text for pre service early childhood elementary and special education teachers as well as early career researchers or as a professional development resource for in service teachers supervisors and administrators school psychologists homeschool parents and other educators
