Practice Nurse Dawn Camp-Sorrell, Rebecca Ann Hawkins, 2000      Clinical Oncology International Union Against Cancer, 2012-12-06

The outstanding success of the First Edition and the expansion of our knowledge about cancer over the 5 years since its publication have led to the decision to publish a Second Edition which has been fully revised rewritten and enlarged by the addition of several sections The First Edition was translated into Italian Japanese Polish and Serbo Croat and it is expected that additional translations French German Spanish Portuguese etc will make this Second Edition a truly international basic cancer Manual The Revision Committee is convinced that all students and general physicians should know

a the important basic aspects of cancer  
b some details of the most common cancers and  
c a few important points about the less common cancers

An attempt has been made to strengthen Part I General Aspects which is considered to be the most important part of the Manual for the world s physicians However the most common cancers in one part of the world are not necessarily the same in other parts and it is planned to work with local groups to produce adaptations and translations as seem appropriate In particular the UICC is anxious to work with local national and international committees to help improve the educational experience of students and general physicians in the geographic areas in question Regional Conferences held by the UICC in Latin America Asia and the Middle East have resulted in initial plans to accomplish this aim
