Cerro Palenque Power And Identity On The Maya Periphery:

Cerro Palenque Rosemary A. Joyce, 1991 Gender and Power in Prehispanic Mesoamerica Rosemary A.

Joyce, 2009-06-23 Gender was a fluid potential not a fixed category before the Spaniards came to Mesoamerica Childhood training and ritual shaped but did not set adult gender which could encompass third genders and alternative sexualities as well as male and female At the height of the Classic period Maya rulers presented themselves as embodying the entire range of gender possibilities from male through female by wearing blended costumes and playing male and female roles in state ceremonies This landmark book offers the first comprehensive description and analysis of gender and power relations in prehispanic Mesoamerica from the Formative Period Olmec world ca 1500 500 BC through the Postclassic Maya and Aztec societies of the sixteenth century AD Using approaches from contemporary gender theory Rosemary Joyce explores how Mesoamericans created human images to represent idealized notions of what it meant to be male and female and to depict proper gender roles She then juxtaposes these images with archaeological evidence from burials house sites and body ornaments which reveals that real gender roles were more fluid and variable than the stereotyped images suggest

ethnographers with an interest in Mesoamerica **Ancient Maya Gender Identity and Relations** Lowell S. Gustafson, Amelia M. Trevelyan, 2002-07-30 The first book to examine how the ancient Maya defined gender Contributors explain what it meant to be male and female They show how gender was experienced and what the bases were for gender designations They demonstrate how gender relations affected other areas of Mayan life such as the arts cosmology economics politics religion and social structure And they analyze the changes in Mayan gender relations and identities that were fostered by evolving historical systems There was no single Mayan polity nor was there a unitary cultural approach Certain similarities in culture account for the observation of a general commonality among the ancient Maya but there clearly were significant differences between Mayan sites within the same site over time and even between social sectors at the same site in any given time this is no less true for ancient Maya gender identity and relations Thus the authors seek to explain why emphasis upon bilateral inheritance of power and prerogative was emphasized in artwork at some periods and some sites and not at others Avoiding the vain attempt to provide a single explanation they seek to offer a clearer sense of the richness of their topic **The Dynamics of Power** Maria O'Donovan, 2002 *Archaeological Investigations in the Eastern Maya Lowlands*, 2009

Maya Relief Sculpture Regional Styles and Community Identity at Copán, Palenque and Yaxchilan Jan McHargue, 1995 Political Identity and Archaeology in Northeast Honduras Thomas W. Cuddy, 2007 In *Political Identity and Archaeology in Northeast Honduras* Thomas Cuddy fills a substantial void in the scholarship on the origins of complex societies and the Central American political landscape drawing on previously unexamined research conducted by anthropologist William Duncan Strong during a 1933 expedition to find the southern reaches of Maya culture From AD 200 until the Spanish conquests of the sixteenth and seventeenth centuries the Pech chiefdoms of northeast Honduras maintained their autonomy through tactful engagement with the powerful states and empires of Mesoamerica and increasingly large societies like the Greater Nicoya region of Costa Rica Cuddy working with Strong's untapped fieldwork examines symbolic expressions to reconstruct the dynamic contexts that structured power in Central American prehistory and shaped the political identity of northeast Honduras By being similar to but distinct from their powerful neighbors the polities of northeast Honduras created their own senses of power and identity that served their continued growth while states and empires crumbled around them *Political Identity and Archaeology in Northeast Honduras* suggests new avenues for understanding the structure and administration of chiefdoms by revealing the archaeological resources and rich ethnohistoric context of the area and the compelling history of its early scholarly explorations

Geographies of Power Sandra L. López Varela, Antonia E. Foias, 2005 Twelve contributors present the contents of the Terminal Classic the Mayan Lowlands Central America ceramic complexes in their area of study and discuss them against the complexity and diversity of social processes illuminated by recent investigations Contents An Introduction to Geographies of Power Sandra L Lopez Varela and Antonia E Commoner Ritual and Ideology in Ancient Mesoamerica Nancy Gonlin, Jon C.

Lohse,2007-01-30 This volume explores the ritual life of Mesoamerica s common citizens inside and outside of the domestic sphere from Formative through Postclassic periods Building from the premise that ritual and ideological expression inhered at all levels of society in Mesoamerica the contributors demonstrate that ideology did not emanate solely from exalted individuals and that commoner ritual expression was not limited to household contexts Taking an empirical approach to this under studied and under theorized area contributors use material evidence to discover how commoner status conditioned the expression of ideas and values

Pottery of Prehistoric Honduras John S. Henderson, Marilyn Beaudry-Corbett, 1993 The contributors to this volume have addressed issues of systematics in pottery analysis that perplex archaeologists wherever they work These issues are not approached by setting forth rules or by adopting a how to approach but rather by example as the various researchers give the background to their work explain their method and present the classified pottery from their investigations An in process statement of what we are learning from pottery about chronology interaction and the nature of regional cultural development this volume can be used by archaeologists working in southern Mesoamerica and northern Central America who will find it valuable for comparative analysis and by archaeologists dealing with issues of systematics in pottery analysis in different culture areas but facing many of the same problems that researchers do in Honduras
