**Diversity Dimensions in Mathematics and Language Learning** Annemarie Fritz,Erkan Gürsoy,Moritz Herzog,2021-06-08 Extensive research is available on language acquisition and the acquisition of mathematical skills in early childhood But more recently research has turned to the question of the influence of specific language aspects on acquisition of mathematical skills This anthology combines current findings and theories from various disciplines such as neuro psychology linguistics didactics and anthropology

**Making Sense of Word Problems** Eric de Corte,Brian Greer,Lieven

Verschaffel,2000-01-01 Word problems have been a staple of mathematics instruction for centuries yet the rationale for their use has remained largely unexamined A range of findings have shown how students consistently answer them in ways that fail to take account of the reality of the situations described This monograph reports on studies carried out to investigate this suspension of sense making in answering word problems In Part One a wide range of examples documenting the strength of the phenomenon is reviewed Initial surprise at the findings was replaced by a conviction that the explanation lies in the culture of the mathematics classroom specifically the rules implicitly governing the nature and interpretation of the word problem genre This theoretical shift is reflected in Part Two A detailed analysis of the way in which word problems are currently taught in typical mathematical classrooms is followed by reviews of design experiments illustrating how by immersing students in a fundamentally changed learning environment they can acquire what the authors consider to be more appropriate conceptions about and strategies for doing word problems Part Three turns to a wider discussion of theoretical issues a further analysis of the features of the educational system considered responsible for outcomes detrimental to many students understanding and conception of mathematics and suggestions for rethinking the role of word problems within the curriculum

**Cultivating Mathematical Hearts** Maria del Rosario Zavala,Julia Maria Aguirre,2024-05-17 This book is for everyone who believes there must be a better stronger way to teach mathematics that fosters student joy and curiosity rather than fear and disconnection a way that demonstrates to children that mathematics is both a mirror and a lens it reflects who you are and who you are becoming and it helps you analyze the world around you A way to see mathematics as a tool to make positive change in our communities and build foundational knowledge and skills to solve novel and complex problems in our world and its future This book is organized into two main parts Part 1 describes the fundamental principles ideas and vision i e foundations of culturally responsive mathematics teaching It also introduces a multidimensional framework for culturally responsive mathematics teaching Part 2 features a set of chapters that illustrate culturally responsive mathematics teaching in action

**The Ohio Teacher** ,1929 Word Problems Carolyn Chapman,Rainbow Bridge Publishing Staff,2004-12-17 Teach students how to decipher and easily solve word problems with Skill Builders Word Problems The exercises include addition subtraction multiplication division graphing fractions measurement area and perimeter decimals percentages money values as well as time It also includes a special emphasis on multistep problems and supports NCTM standards
