

Answers to Term Test 2 (December 4, 2009):

1a)

After the fall in market demand:

P_0 falls to P_1

Q_0 falls to Q_1

q_0 falls to q_1

Profits fall from zero to shaded zero

1b) No, the market price will rise. Since the representative firm is suffering an economic loss, firms will quit the industry and the market supply curve will shift to the left, thus increasing market price.

1c) No, market price will be unchanged. The MR and MC schedules for the representative firm will not change, so each firm's output will be unchanged. No firms will enter the industry in the short run, so the market SS (as well as the market DD) will be unchanged.

2a) $\$100 \div 2 = \50

2b) $\$10 \div 1 = \10

2c) $\$200 \div 4 = \50

2d) $(\$250 - \$100) \div 5 = \$30$

2e) The L.D.R. indicates that, if there is a fixed factor of production and a variable factor, the marginal product of the variable factor must eventually decline and, thus, the marginal cost must eventually rise. This cost schedule is consistent with the L.D.R. After output is 3 toys per week, marginal cost is rising which implies that marginal product is falling.

At $Q = 3$: $MC = \$10$

At $Q = 4$: $MC = \$30$

preparation I leveraged Stephane Mareek's course Tutorial Dojo's practice tests and flashcards. My manager also shared his AWS skill builder account. Post evaluation I found Mareek's practice tests to be outdated and more challenging than required with his course delving too deeply into some areas. In contrast Tutorial Dojo's materials were simpler. My scores ranged from 65% on Mareek's tests to 75-80% on Tutorial Dojo with a 740 on the official AWS practice test. Sharing this for those on a similar journey. Get your copy now and clear the exam at your first attempt.
