

LET'S SAVE THE WILD ANIMALS OF OUR WORLD !!

Hello to you all! My name is Laura Ashley. I am a zoologist and I work to preserve and save endangered species, that is animals which are disappearing from our planet, because of the changes in climate, hunting, or poaching, and the destruction of their habitat. Do you know that one of the last male white rhino has just died and here are some estimates for some very emblematic animals. There are only about 700 mountain gorillas left, 1,600 giant pandas, between 2,000 and 3,000 Bengal tigers, between 7,000 and 10,000 cheetahs, about 130 condors, less than 50 Amur leopards, between 4,000 and 6,600 snow leopards, about 7,000 orang-utans, 80% of the population of the white shark has disappeared in less than 15 years, 80% of the population of the Irrawaddy dolphin has disappeared in the last 50 years. The Chinese dolphin disappeared in 2006, the giant Pinta tortoise in 2012, 50% of the Asian elephants were exterminated in one century. Many species are nearly extinct in the wild and can only be seen in zoos!! With the ice disappearing at the poles, polar bears are threatened. Elephants are killed for the ivory of their tusks, rhinos are killed just for their tusks as well, which are reduced to powder and suppose to have medical power. Big cats are killed for their fur, or hunted in safaris for fun! The destruction of big forests leads to the death of many species of animals and plants. Even the bees are dying massively and don't forget that if they do disappear, men will follow soon after. So it is our responsibility and yours as well, you young generations to do our best to preserve the biodiversity of our planet!!

Comprehension Exercises About Endangered Animals:

Learning and Teaching in the Chinese Classroom Shane N. Phillipson, Bick-har Lam, 2011-10-01 A major concern of all education authorities around the world is the challenge that schools face in catering for learner diversity That this concern is shared by authorities in East Asia including the Education Bureau EDB of Hong Kong is surprising given the high academic achievement of students from this part of the world This book helps to meet this challenge for teachers in East Asia by focusing on specific research that helps explain the basis for diversity in the Chinese learner Although there are many textbooks that cover the basic principles of educational psychology few do not focus on the Chinese learner This book makes the link between the broad field of educational psychology and how these theories contribute to our understanding of the Chinese learner This book is unique in that it draws on recent research to illustrate the application of these theories thereby helping teachers and students in teacher education programmes understand the variability in student achievement Our book is based on the idea that the Chinese context is in many ways different to other cultural contexts and that teachers can make a difference to the outcomes of student learning We also draw on our many years of experience in educating future teachers where our students want us to focus on the Chinese classroom Our student teachers also want to be educated by professors who are themselves researchers In drawing on research about the Chinese learner we also bring to our student teachers the richness and value of educational research We also encourage our student teachers to think of themselves as professional researchers in terms of developing an understanding of the research literature and in finding solutions to their classroom problems
