The photos are connected with the topic of school. Both photos show students in class.

In the first photo I imagine that they're about 13 years old. It looks like a science lesson and judging by the students' expressions, I'd say that they are enjoying their lesson. They look interested and it looks as though they are working hard. Most of them are looking at the experiment and working together. They are all wearing uniform – it's quite an old-fashioned-looking uniform, so I would guess that it's a private school, but it could be a state school. It's hard to say.

The second photo also shows students in a classroom. I reckon they are about 17 years old. It's a mixed class of boys and girls. It's difficult to tell what kind of lesson they're in. Their teacher is handing a paper to one student. It could be that they're in a maths lesson. These students aren't wearing uniform. It looks as if one of them is asleep. It's clear that the girl in the front desk isn't interested in the lesson or perhaps she doesn't understand what she has to do.

**A Holistic Approach to Rights** Eugene Schlossberger,2007-11-15 Applying new theories about rights to pressing social issues A Holistic Approach to Rights suggests major changes are needed in the ways we think about rights and formulating social policy Part I analyzes rights as networks of warrants socially recognized sanctions for doing saying demanding believing feeling or thinking something as one s due On this account rights are more varied and play a more diverse and open ended role in legal and moral thinking than most theories of rights allow A new theory of natural rights treats them as claims that every person has upon the state as a condition of legitimacy to make adequate provision for those features of human life that require force against persons to be justified Moral rights such as the right to the truth derive from team loyalty due fellow members of the moral community and can be lost by someone who acts in ways that undermine the moral enterprise Part II provides detailed analyses of affirmative action group rights the rights of future generations reproductive rights the use of new reproductive technologies and speech rights Specific conclusions include an innovative proposal for regulating violence and pornography in the media      Discovering Computers 2001 Gary B.
